1. CHANGES AFFECTING THE UCI

The Chairman of the management company Lazard Frères Gestion SAS made the following decision in relation to the FCP **LAZARD SUSTAINABLE CREDIT 2025** (ISIN code: FR0013444916; FR0013464153):

- i) The renewal of the fund for a new carry period until November 29th, 2030
- ii) Modification of the investment objective
- iii) Change to the investment policy
- iv) Change in the ESG category to “reduced disclosure”
- v) The change of name of the Fund to “**LAZARD 2030**”
- vi) Change in the name of the units:
 - o *PC H-EUR units > PC EUR units*
 - o *PD H-EUR units > PD EUR units*
 - o *RC H-EUR units > RC EUR units*
 - o *RD H-EUR units > RD EUR units*
 - o *EC H-EUR units > EC EUR units*
 - o *ED H-EUR units > ED EUR units*

The ISIN codes remain unchanged.

➤ **Effective date: 01/07/2025.**

2. MANAGEMENT REPORT

PERFORMANCE

The performance of the EC unit over the period was: 3,83%.

The performance of the ED unit (dividends reinvested) over the period was: 3,82%.

The performance of the PC unit over the period was: 3,62%.

The performance of the PD unit (dividends reinvested) over the period was: 3,62%.

The performance of the RC unit over the period was: 3,00%.

The performance of the RD unit (dividends reinvested) over the period was: 2,99%.

Performances vary over time and past performance is no guarantee of the UCI's future results.

The benchmark's performance over the period was: 2,01%

ECONOMIC ENVIRONMENT

In the United States, the surge in imports in anticipation of higher tariffs caused a mechanical contraction in GDP in the first quarter (-0,1% after +0,6%). Despite recent declines, average tariffs paid by US importers remain at a very high level of 16%, its highest since 1937. The next few months should see this shock transmitted to economic activity and inflation. Beyond foreign trade, data showed signs of a slowdown in activity, with less favourable trends in consumption and real estate.

The labour market remained resilient, while inflation stabilised at a high level of +2,5% year-on-year, prompting the Fed to maintain its key interest rate at 4,25%-4,50%. It is approaching the second half of the year with a cautious stance regarding the effect of tariffs on inflation. In terms of fiscal policy, the Administration moved forward with its programme with the ratification of the Big Beautiful Deal, whose implications for the deficit and debt are raising questions.

In the Eurozone, GDP growth was solid in the first quarter (+0,6% after +0,3%), thanks to foreign trade and domestic demand. However, when adjusted for the effects of Irish intellectual and industrial property rights, growth came in at +0,3%, a level in line with the PMI indicators. After the phase of anticipation of tariff hikes, exports declined as a result. On the other hand, consumption data remained buoyant and business confidence held up fairly well in the face of trade uncertainties. The European economy could experience slower growth in the coming months due to trade uncertainties and the knock-on effect of the phenomenon of advance purchasing, which boosted economic activity at the beginning of the year. The unemployment rate remained low, while inflation continued to slow, returning to around 2%.

The ECB cut its key rate to 2,00% and hinted that the end of the rate-cutting cycle was approaching. In reality, the decline in inflation gives the ECB some room for manoeuvre to cut rates if the economic situation deteriorates unexpectedly.

In Japan, GDP growth was slightly negative in the first quarter due to a fall in exports and a slowdown in consumption, with continued price rises weighing on household confidence and purchasing power. Despite this backdrop of persistent inflation, the very cautious Bank of Japan preferred to maintain the status quo by not raising its key rates.

In China, where the opposite is true (deflation), GDP growth stabilised at +5,4% year-on-year in the first quarter. Domestic demand, which had been penalised by the slowdown in the real estate market, regained momentum thanks to temporary support measures from the authorities. Above all, exports remained buoyant. Although the increase in US tariffs caused a sharp decline in exports to the United States, the slowdown in the country's overall exports remained limited, with other destinations compensating for much of the shortfall in US exports. From a trade point of view, the worst-case scenario has been avoided, but it is feared that the export driver will suffer from the increase in US tariffs to around 40%. This could lead to a slowdown in growth over the coming months.

Markets

The first half of the year was marked by the weakness of the dollar, which recorded one of its worst half-yearly performances since 1973. This is all the more remarkable given the tense geopolitical context (the Indo-Pakistani conflict, the conflict between Iran and Israel, the continuing war in Ukraine) and the fact that investors are anticipating a limited number of Fed rate cuts.

Despite these theoretically buoyant factors, the dollar fell, supporting commodities such as gold, which hit all-time highs against the dollar, while industrial metals such as copper and aluminium remained at high levels. North Sea oil (Brent) temporarily benefited from a geopolitical premium of around ten dollars before returning to the \$67 level at the end of the quarter.

The consequences for the dollar of "Liberation Day" on April 2nd, 2025, one of the most important days of the year for the markets, were probably not what the US Administration had expected. In addition to the surprise weakness of the greenback, the widening of the yield spreads between interest rate swaps and US Treasury yields, which are used to measure the government's credit premium, reached levels reflecting extreme mistrust in the quality of the world's largest borrower (nearly 1% at 30 years). This mistrust is probably not unrelated to Treasury Secretary Scott Bessent's announcement of a 90-day truce on April 9th, just seven days after the start of this new trade offensive.

During this episode of panic, which was ultimately very short-lived, equity market volatility indices reached the extreme levels usually associated with major financial or economic crises, dragging indices such as the Nasdaq down by 17%.

From April 9th onwards, equity indices began a historic rebound. Over the quarter, the US markets, led by the S&P500 (up 10.6% in local currency) finally managed to break away from the highs seen at the start of the year. This performance needs to be qualified when translated into euros (+1,5%) because of the dollar's sharp fall against all the other G10 currencies, and particularly against the euro and the Swiss franc. Despite this movement, which may reduce the export competitiveness of Eurozone companies, domestic stock market indices were up (+3,5% for the Eurostoxx in the second quarter, +8% for the DAX, which benefited from the momentum in the defence sector, and +6,5% and +4,6% respectively for the Spanish and Italian stock markets). Only the CAC40, affected by the setbacks in the luxury goods sector, was unable to maintain its level (-1,6%) over the quarter.

Emerging markets ended the quarter with an 11% rise in dollar terms, catching up with the excellent performances of the Italian, Spanish and German stock markets, with gains of +13,7% since the beginning of the year.

Apart from the Japanese yield curve, which has been affected by persistent domestic inflation, the short end of the yield curve in most G10 countries are trading between 100 and 150 basis points below their levels a year ago, reflecting the progress made since central banks began their cycle of rate cuts in 2024 in Europe and the United States. Nevertheless, the pace of rate cuts anticipated by the markets is losing momentum, given the more modest gains made on the core inflation front, the uncertainty surrounding the effects of US tariffs on prices, and the resilience of the labour market. On the longer end of the bond yield curve, performance was mixed: the 10-year German government bond yield fell by 13 basis points to 2,61% over the quarter, while the 10-year US Treasury yield ended the half-year virtually unchanged at 4,23%.

MANAGEMENT POLICY

July 2024

July was a good month for the bond markets, benefiting from the dual positive effects of falling interest rates and tightening spreads. Sovereign bond yields fell, supported by weaker-than-expected economic data, rate cuts by some central banks and the resurgence of risk aversion. With the exception of the Japanese 10-year yield, which remained stable at 1,06% over the month, the US and German 10-year yields fell by 37bp to 4,03% and by 20bp to 2,30%, respectively. In the Eurozone, yield spreads remained volatile against the backdrop of general elections in France. The ten-year OAT spread widened by 3bp to 67bp against German bonds. Ten-year inflation expectations corrected by 12bp in Europe and 10bp in the United States. At the end of the month, investors priced in four rate cuts by the Federal Reserve and just under three by the European Central Bank by end-2024. Against this backdrop, credit spreads tightened across all segments and sectors, with -9bp for IG Credit, -5bp for HY, -16bp for Tier 2 financial bonds and -24bp for AT1 bonds. The tightening for IG hybrids was less marked at just -2bp. Technical factors are positive: demand remains solid and primary activity slowed again in July, with seasonal effects and volatility weighing on volumes.

Volumes were therefore down on June, with €24bn for financials and €11bn for corporate issuers. The portfolio's structure changed marginally as benchmark rates eased and credit spreads tightened.

August 2024

In August, the across-the-board fall in US interest rates was supported by the central bank stating it was ready to cut rates. Jerome Powell confirmed that the time for a rate cut had arrived, thereby validating an initial cut in September. The focus has shifted from inflation to the labour market, which appears less robust. Economic activity data were reassuring, and the risk of escalation in the Middle East had no significant impact. In Europe, short-term rates fell by around 14bp (Germany), with the two-year yield closing at 2,39% while the ten-year yield remained stable at 2,30%. In the United States, yields fell by between 34bp and 11bp across the curve, with the US 10-year ending the month at 3,90%. At the end of the month, the market was pricing in almost four 25bp cuts in 2024 by the Fed and between two and three cuts by the ECB over the same timeframe. Credit spreads widened at the start of the month and then tightened again over the following weeks. The riskiest Sub-funds (corporate HY bonds, corporate subordinated hybrids and AT1, etc.) closed the month with a tightening of between 5 and 10bp, in contrast to senior bonds, which widened by an average of 5bp. As a result, all asset classes turned in positive performances in August.

September 2024

In September, in the wake of the Federal Reserve's pivot to cut rates by 50bp and the ECB's continued 25bp cut, yields fell in a steepening movement. In addition, economic data was disappointing in the Eurozone and employment data reinforced the Fed's view that the labour market is moderating. Two-year yields dropped 32bp to 2,07% in the Eurozone and 28bp to 3,64% in the United States, while ten-year yields dropped 18bp to 2,12% and 12bp to 3,78% in the respective regions. Ten-year inflation expectations fell by 7bp to 1,94% in the Eurozone and stabilised at 2,40% in the US. At the end of September, the market priced in between two and three 25bp cuts by the Fed between now and the end of the year, and two 25bp cuts by the ECB over the same period. Against this backdrop, credit spreads were virtually unchanged for IG Senior Credit and T2 financials, while they widened by 7bp for IG Corporate hybrids, +7bp for HY and +13bp for AT1 bonds. By sector, spread variations were small, with the real estate sector outperforming and the automotive sector the exception. The automotive sector has been at the heart of the news, with the sector clearly underperforming due to growing concerns about the general economic cycle, in addition to other issues already in the news, including slower-than-expected growth in demand for electric vehicles, pressure on the Chinese market and Chinese supply that could spill over into Europe. Despite a small or even negative contribution from the spread component, the interest rate effect, combined with the carry effect, enabled all asset classes to deliver strongly positive performances: +1,2% for IG credit, +1% for HY, +1,15% for T2 and +1% for €AT1. The primary market was very active, with more activity than expected at €79bn (€41bn for corporates and €38bn for financials). The upward surprise came mainly from the financial and real estate sectors, with a significant increase in supply.

October 2024

October was characterised by a sharp rise in interest rates as a result of Trump's rise in US polls and more favourable economic data on both sides of the Atlantic. US and German ten-year bond yields rose by 50bp to 4,28% and 27bp to 2,39%, respectively. In the Eurozone, the ECB unanimously approved a 25bp cut in the deposit rate to 3,25% at its meeting, where Christine Lagarde emphasised the downside risk to growth and once again the fact that the ECB is gaining confidence in the ongoing disinflation. The ten-year OAT-Bund spread tightened by 6 basis points to 73bp, while Moody's and Fitch maintained their ratings unchanged at Aa2 and AA- respectively, but each lowered their outlook to negative. Against this backdrop, credit outperformed with credit margins tightening, from -12bp for senior IG credit to -36bp for AT1 financials. All sectors tightened, with real estate and the automotive sector outperforming, recouping most of September's underperformance. The least risky (IG) credit nevertheless posted a negative absolute performance in October, impacted by a negative interest rate effect despite the positive contribution of tightening margins and carry trades. The IG credit primary market remained buoyant with significant activity of close to €43bn (€24bn for corporates and €19bn for financials).

November 2024

In November, government bond yields fell against a backdrop of deteriorating economic data, particularly in the Eurozone. At the same time, fears of the Trump effect built into US bond prices are gradually fading. German and US ten-year bond yields fell by 30bp to 2,09% and 12bp to 4,17%, respectively. In the United States, the Federal Reserve cut its rates by 25bp to the 4,75%-5% range. The Fed therefore remains vigilant with regard to the labour market, while its confidence in disinflation has not waned. In Europe, concerns about the current business momentum are growing. In Germany, against a backdrop of economic deterioration, following the end of the coalition government as a result of deep economic disagreements, new elections are scheduled for February 2025. In France, the prospect of a vote of no confidence weighed on the ten-year OAT-Bund spread, which widened by 7bp to 80bp. Credit posted positive performances across all segments driven by the interest rate effect, despite the widening of margins. The automotive and energy sectors underperformed, unlike real estate, which continued to appreciate. The primary market for IG credit was very active, with volumes up on October at close to €51bn (€29bn for corporates and €22bn for financials).

December 2024

In December, the Federal Reserve cut its rate by 25bp in the range [4,25% - 4,50%], bringing its total cuts in 2024 to 100bp, but now expects only 50bp of rate cuts in 2025. Markets stumbled again after the Fed took a more hawkish stance than expected. Meanwhile, in Europe, the ECB cut rates by another 25bp in December, bringing its deposit rate to 3% in December, but investors were disappointed that it did not adopt a more accommodative stance. These factors subsequently led to a rise in interest rates, affecting sovereign bonds. German and US 10-year bond yields rose over the month, by 28bp to 2,37% and by 40bp to 4,57%, respectively. At the end of 2024, investors factored in 43bp of rate cuts by the Federal Reserve and 110bp of cuts by the ECB for 2025. Elsewhere in France, Michel Barnier's government collapsed in the first successful vote of no confidence since 1962. This put further pressure on French assets, and the spread between French and German 10-year bond yields hit their highest levels since 2012, at the time of the euro crisis. Against this backdrop, spreads tightened across all sectors and segments: -7bp for IG credit, -18bp for hybrids, -22bp for HY credit, -45bp for AT1 debt but only -5bp for T2 financials. IG credit posted a negative performance of -0,43%, as the positive spread effect and carry failed to offset the negative interest rate effect over the month. In contrast, HY credit, corporate hybrids and T2 financials, which by nature are less sensitive to interest rates, benefited from a more pronounced spread tightening, enabling them to post very positive performances, underpinned by both the spread and carry components, despite the negative interest rate effect of between 0,60% and 1,5%. As expected, primary activity slowed sharply in December, although there was a small wave of transactions in the first week of the month. Primary supply fell sharply to €6.5bn (€3,8bn for financials and €2,7bn for corporate issuers), in line with usual seasonal trends. However, activity is set to pick up again, with a very busy January due to seasonal factors. The portfolio's structure changed marginally as benchmark rates rose sharply and credit spreads tightened.

January 2025

January was marked by high volatility on the fixed-income markets, fuelled by uncertainty over future US government measures and the return of new issuance at the start of the year. The Federal Reserve left its rates unchanged in the [4,25%-4,50%] range, while the European Central Bank and the Bank of Canada cut rates by 25bp to 2,75% and 3%, respectively. Ten-year German bond yields fell 9bp to 2,46%, while ten-year US bond yields stabilised at 4,54%. Credit margins tightened across all segments and sectors. This, together with carry, helped to offset the negative effect related to the rise in benchmark rates, thereby delivering positive returns. The lowest ratings posted the best performances. Technical factors were favourable, with inflows returning to the credit asset class. Activity on the primary market was buoyant, with almost €92 billion in credit issues meeting strong demand. The structure of the portfolio was stable against a backdrop of rising benchmark rates and tightening credit spreads.

February 2025

February was an incredibly eventful month for the markets, marked by fixed-income market volatility, particularly in the Eurozone, fuelled by the US government's trade policy, doubts about US growth and geopolitical tensions. With the establishment of a truce between Ukraine and Russia uncertain, and the United States likely to suspend its military aid, Europe is trying to agree on a defence budget. This contributed to the underperformance of German ten-year yields, which fell by just 5bp to 2,41%, compared with a 33bp fall to 4,21% for US ten-year yields. At the end of February, investors were expecting the Federal Reserve to cut rates by around 68bp in 2025, the ECB by almost 87bp and the Bank of England by 58bp. In the United States, the minutes of the Federal Reserve meeting confirmed the pause over the next few months and the members' mistrust with regard to the risk of inflation. Eurozone activity indicators remained lacklustre, although there was a slight improvement in the manufacturing sector and sentiment surveys were marginally more positive. Inflation fell by 0,3% month-on-month in January, bringing headline inflation to 2,5% and core inflation to 2,7% year-on-year, which should enable the ECB to continue cutting rates at a gradual pace. The German federal elections on February 23rd were marked by a surge in support for the party AfD, suggesting that Friedrich Merz (CDU) is likely to be the future Chancellor, even though the possible coalition options are limited. S&P maintained France's rating at AA-, but lowered the outlook to "negative", citing the need to reduce the deficit within two years. The ten-year OAT-Bund spread, now at 73bp, already seems to have taken these factors into account. The Q4 24 earnings season continued. Overall, earnings were in line with expectations. Credit margins changed little, with the exception of HY credit, which tightened sharply over the month (-26bp). Despite a small or even negative contribution from the spread component, the positive interest rate effect enabled a positive performance over the month, from +0,50% for IG credit and up to 1,60% for AT1 financial bonds. By sector, real estate companies outperformed (-10bp), benefiting from the fall in interest rates, while the automotive sector (+4bp) suffered in particular from uncertainties linked to the introduction of tariffs by the US administration. IG primary market supply continued to rise in February, despite persistent trade uncertainty and some weakness in US economic data. A total of €81,2bn was issued during the month, making February the biggest month on record. Year-to-date primary market supply, at €178bn, is the second highest ever, just behind 2009. The market has so far absorbed primary market volumes well, supported by solid inflows and massive redemptions. The structure of the bond portfolio was stable against a backdrop of falling benchmark rates and small changes in IG credit margins.

March 2025

March was characterised by renewed volatility on the sovereign debt markets and divergence between the US and European markets. In Europe, yields suffered a bullish shock, with the rebound influenced by Germany's historic announcement of a €500bn infrastructure and defence plan, as well as a plan to rearm the European Union. Fears of an increase in new issues led to a surge in German yields. The ten-year yield rose by 33bp as the 2-year/10-year curve steepened from 31bp to 69bp. In the United States, US bonds are performing well against a backdrop of resurgent stagflation and fears of a marked slowdown in the economy. The two-year rate fell by 11bp to 3,88%, while the ten-year rate remained stable at 4,21%. The Federal Reserve kept rates unchanged in the 4,25%-4,50% range, while announcing a slowdown in the reduction of its balance sheet through the reduction of its Quantitative Tightening, which will begin on 1 April, by changing the cap on government debt from 25bn to 5bn but without changing the pace on MBS. While J. Powell highlighted the many uncertainties, the Fed's growth forecasts were revised downwards, while its inflation forecasts were revised upwards. The dots continue to anticipate two rate cuts this year. Credit spreads widened over the month, as news flowed in about US tariffs and investors tried to assess their intensity and impact on the economy. Credit spreads widened slightly for IG credit (+3bp) and more sharply for HY credit (+58bp) and AT1 subordinated debt (+46bp). Given the negative contribution of the spread component and the negative interest-rate effect, asset class performances were strongly negative over the month, at around -1,0% for IG and HY credit and up to -1,70% for AT1 financial debt. All sectors widened, with the exception of capital goods (-2bp), where issuers linked to the defence sector outperformed (Thales, Safran, Airbus) following the adoption of the stimulus plan in Germany. On the other hand, property companies underperformed, impacted by high interest rates. The automotive sector has also suffered from the implementation of the US administration's tariffs of 25% on all vehicles and components from April 2nd, particularly impacting German and Asian manufacturers and those importing from Mexico and Canada.

The IG primary market remained active despite the increased political uncertainty in the United States, which led to a widening of spreads and a rise in volatility. A total of €57bn was issued during the month. Cumulative primary supply since the start of the year amounts to €238bn. Primary volumes continued to be well absorbed, supported by strong inflows and substantial redemptions. The structure of the portfolio was stable against a backdrop of sharply rising benchmark rates and widening credit spreads.

April 2025

April was a month of significant volatility on the financial markets, with the consequences of Liberation Day causing a disruption of the US sovereign bond market from the start of the month. The escalation of trade tensions, particularly with China, led to a major loss of confidence in US assets, with ten-year US bond yields rising by almost 50bps to 4,60% as the dollar depreciated against all currencies. As the month progressed, mixed economic data releases were relegated to the back burner of investors' attention, and it was a form of de-escalation on the trade war front that brought renewed optimism. In the Eurozone, the ECB cut its deposit rate by 25bp to 2,25%, in line with market expectations. The German two-year yield fell by 29bp and the 2/10-year curve steepened by 7bp to 76bp, while yield spreads widened slightly to between 2 and 6bp against German debt, following a rise of almost 25bp, particularly on peripheral bonds. On the credit side, April was an absolutely seismic month, with the announcement of reciprocal tariffs by the United States triggering a huge sell-off and high volatility (VIX above 50) at the beginning of the month. However, calm began to return to the markets after the US administration announced a 90-day pause and the start of negotiations. As a result, tensions began to ease and markets rallied, ending the month with positive returns thanks to the general fall in rates and, to a lesser extent, carry trades. Despite an tightening of spreads from 10 April onwards (between 50% and 60%), credit margins ended the month at their widest level ever, across all segments and sectors: +15bp for IG credit, +19bp for IG corporate hybrids, +42bp for HY credit and +45bp for AT1 financial bonds. The performance of asset classes was positive overall, thanks to a strongly positive interest rate effect: +0,03% for AT1 financials (€), +0,21% for Corporate HY, +0,33% for Corporate hybrids and +0,91% for IG credit. As a result of increased volatility, IG primary supply was low at the start of the month. But the easing of tensions in the second half of the month was accompanied by abundant primary supply, with volumes peaking in the last week of April. A total of €50 billion was issued over the month, down on April 2024. The Q1 25 earnings season began. Overall, earnings were in line with expectations. The portfolio's structure changed very marginally against a backdrop of sharply falling benchmark rates and widening of credit spreads. The portfolio is now 87% invested in money market instruments with a maturity of less than the end of June 2025.

May 2025

Improving economic figures, the lowering of tariffs between the United States and China and a preliminary agreement between the US and the UK are prompting investors to rule out the likelihood of a global economic slowdown. The sovereign bond market is gradually pricing in these optimistic factors. The German two-year yield rose by 9bp to 1,78%, while the 2-10 year curve flattened by 3bp to 72bp. Yield spreads in the Eurozone tightened slightly. However, US Treasuries went through a much more difficult period due to growing concerns about the fiscal situation following Moody's downgrading of the US credit rating. Attention also focused on the tax bill currently before Congress. May was a mixed month for long-term sovereign bond issuance, with demand falling sharply, reflecting investor caution about certain countries' fiscal deficits and debt management. Under pressure, yields on 30-year US and Japanese bonds reached 5,15% and 3,20% respectively before stabilising. At the end of the month, trade tensions temporarily returned to the forefront following the announcement of 50% US tariffs on European products, which had little impact on bond markets as the measure was postponed until July 9th following discussions with Ursula Von der Leyen. Against this backdrop, credit spreads tightened significantly across all segments and sectors: -14bp for IG credit, -20bp for T2 financial bonds, -38bp for AT1 financial bonds and -51bp for HY credit. This movement largely erased the sharp depreciation at the beginning of April following the initial tariff announcements. Asset class performances were positive thanks to the contribution of the spread component and carry, despite a negative interest rate effect: +0,52% for IG credit, +0,72% for T2 financial bonds, +1,35% for HY corporate bonds and +1,71% for AT1 financials (€). The primary market made a spectacular comeback in May after a very quiet April. May saw a very strong rebound with significant supply that was very well absorbed by the market.

A total of €110 billion was issued over the month. The Q1 25 earnings season continued. Overall, earnings were in line with expectations. The portfolio's structure changed marginally as benchmark rates rose slightly and credit spreads tightened.

June 2025

In June, the major central banks paused their monetary policies, with the exception of the European Central Bank, the Swiss National Bank and Norges Bank, which cut rates by 25 basis points. In the United States, Jerome Powell adopted a wait-and-see stance, revising inflation projections for 2025–2027 upwards and forecasting weaker growth and higher unemployment. US yields fell on the back of economic figures and

accommodative comments from the Fed, while European yields did not follow suit, except for peripheral bonds. The ECB also cut rates, but Lagarde's comments suggested that the rate-cutting cycle would soon come to an end. Fitch downgraded Belgium to AA-, highlighting the challenges facing public finances. In Germany, increased financing requirements and planned military spending weighed on yields. The escalation of the Israel-Iran conflict, despite US intervention, had little impact on bond markets. After a temporary rebound in Brent crude prices, markets stabilised, with a notable tightening of peripheral sovereign spreads, particularly in Italy. Over the period, the German two-year yield rose by 9bp to 1,86%, and the 2-year/10-year segment of the curve steepened by 2bp to 75bp. Yield spreads in the Eurozone tightened slightly, with the exception of France. The ten-year OAT-Bund spread tightened by 2bp to 68bp, while Italian bonds outperformed German bonds by around 11bp across the curve. In the credit market, the resurgence of geopolitical risk in the middle of the month with the lightning war between Israel and Iran ultimately had little impact on credit margins, which were supported more by the resilience of the US economy. Credit margins continue to tighten: -9 bp for IG credit, -15bp for IG corporate hybrids and T2 financial bonds, -36bp for AT1 financial bonds and -7bp for HY credit. All sectors ended the month with tighter spreads, with real estate and energy outperforming, benefiting from the conflict in the Middle East. Asset class performances were strongly positive thanks to the positive contribution of the spread component and carry, despite a negative interest rate effect: +0,24% for IG credit, 0,50% for T2 financial bonds, +0,76% for IG hybrids, +0,44% for HY corporate and 1,69% for AT1 financials (€). After a record month of May in terms of primary issuance and despite geopolitical turmoil, IG primary activity continued at a steady pace in June, with €78 billion issued. Corporate issuance volumes (€42 billion) exceeded those of financials for the third month in a row. Supply continues to be well absorbed by investors despite limited or even negative premiums. The portfolio's structure changed marginally as benchmark rates rose and credit spreads tightened.

Main changes in the portfolio during the year

TRANSPARENCY OF SECURITIES FINANCING TRANSACTIONS AND THE REUSE OF FINANCIAL INSTRUMENTS – SFTR – IN THE ACCOUNTING CURRENCY OF THE UCI (€) During the financial year, the UCI did not enter into any transactions covered by the SFTR regulation.

PROCEDURE FOR SELECTING AND ASSESSING INTERMEDIARIES AND COUNTERPARTIES

The brokers used by the management company are selected on the basis of various evaluation criteria, covering research, quality of order execution and processing and the range of services offered. The management company's "Broker Committee" validates any updates to the list of authorised brokers. Each investment division (fixed income and equities) reports to the Broker Committee at least twice a year on the evaluation of the services provided by the various brokers and the breakdown of the volume of transactions handled.

The information can be consulted on the management company's website: www.lazardfreresgestion.fr

BROKERAGE FEES

Information about brokerage fees is available on the website: www.lazardfreresgestion.fr.

EXERCISING VOTING RIGHTS

The scope and procedures for Lazard Frères Gestion SAS' exercise of the voting rights attached to the securities held in the UCIs managed by it are set out in the guidelines it has drawn up on its voting policy. This document can be consulted on the management company's website: www.lazardfreresgestion.fr.

DISCLOSURE OF ENVIRONMENTAL, SOCIAL AND GOVERNANCE (ESG) CRITERIA

Lazard Frères Gestion firmly believes that the integration of environmental, social and governance (ESG) criteria in the management of assets provides an additional guarantee in terms of a sustainable economic performance.

The long-term performance of investments is not limited to the sole consideration of financial strategy, but must also take into account the company's interactions with its social, economic and financial environment.

The incorporation of ESG criteria therefore is a natural component of our investment process.

Our overall approach can be summarised as follows:

- ✓ Rigorous financial analysis of the company covering the quality of assets, financial soundness, projected cash flows and their reinvestment by the company, the strength of economic profits, profit durability, and quality of management.
- ✓ This sustainability is strengthened by incorporating non-financial criteria:
 - Social criteria: through the development of human capital,
 - Environmental criteria: through the prevention of all environmental risks,
 - Governance criteria: by respecting the balance between the managerial and shareholder structures so as to prevent potential conflicts of interest and safeguard the interests of minority shareholders.

The intensity and methods by which we incorporate ESG criteria may vary depending on the asset class and investment process involved, but the common objective is to ensure better apprehension of ESG risks that are likely to have a strong impact on the value of a company or sovereign asset.

Information on ESG criteria is available on the website: www.lazardfreresgestion.fr.

SFDR AND TAXONOMY

Article 8

Pursuant to Article 50 of the SFDR Level 2 Delegated Regulation, information on the attainment of the environmental or social characteristics promoted by the financial product forming part of this management report is available in the appendix.

USE OF FINANCIAL INSTRUMENTS MANAGED BY THE MANAGEMENT COMPANY OR AN AFFILIATED COMPANY

The table of financial instruments managed by the management company or an affiliated company can be found in the notes to the UCI's annual financial statements.

METHOD USED TO CALCULATE GLOBAL RISK

The Fund uses the commitment method to calculate its global risk on financial contracts.

SWING PRICING

In order to protect the UCI's long-term unitholders, a swing factor will be applied to subscriptions and redemptions that have a significant impact on the UCI's outstandings, which may generate costs for unitholders entering and leaving the UCI that would otherwise have been allocated across all unitholders in the UCI.

Therefore, if, on a particular NAV calculation date, the total net subscription/redemption orders of investors across all categories of UCI units or shares exceeds a threshold predetermined by the management company on the basis of objective criteria and expressed as a percentage of the net assets in the UCI, the NAV may be adjusted upwards or downwards to take account of the readjustment costs attributable to the net subscription/redemption orders. The NAV of each unit or share category shall be calculated separately, but any adjustment shall have an identical impact, expressed as a percentage, on all of the NAV calculations of each unit or share category in the UCI.

The cost parameters and trigger level shall be determined by the management company and shall be reviewed periodically, and at least every six months. These costs shall be estimated by the management company based on transaction fees, bid/offer spreads and tax charges applicable to the UCI.

Insofar as this adjustment mechanism is linked to the net balance of subscriptions/redemptions within the UCI, it is not possible to accurately predict a given time in the future at which swing pricing will be applied. Consequently, neither is it possible to predict the precise frequency at which the management company will have to make such adjustments, which shall not exceed 1% of the NAV (see prospectus). Investors should be aware that the volatility of the UCI's NAV may not reflect solely that of the securities in the portfolio arising from the application of swing pricing.

INFORMATION ON DISTRIBUTED INCOME ELIGIBLE FOR THE 40% ALLOWANCE

Pursuant to the provisions of Article 41 sexdecies H of the French General Tax Code, income on distributing shares is subject to an allowance of 40%.

REMUNERATION

The fixed and variable remuneration paid during the year ended December 31st, 2024 by the management company to its personnel identified as eligible for the UCITS and AIFM regulations can be obtained on request by post from the legal department of Lazard Frères Gestion and is included in the company's annual report.

The total variable remuneration is set by the Lazard Group based on different criteria, including the Lazard Group's financial performance over the past year, taking into account the results of Lazard Frères Gestion.

The total amount of variable compensation should not hinder the ability of the Lazard Group and Lazard Frères Gestion to strengthen their capital base as needed. The General Management decides on the total remuneration amount that will be split between the fixed and variable components, complying with the policy to maintain a complete separation between the fixed and variable components.

All financial and non-financial risks, as well as conflicts of interest, are incorporated into the calculation of the variable remuneration.

It is then individualised and determined partly based on the performance of each identified member of staff.

Each year, Lazard Frères Gestion's Remuneration Policy Compliance Monitoring Committee, which also has two members independent from the management company, is responsible for issuing an opinion on the proper application of the remuneration policy and its compliance with applicable regulations.

Population at 31/12/2024: Fixed-term and permanent contracts of LFG, LFG Luxembourg and LFG Belgique (therefore excluding interns and apprentices and excluding LFG Courtage)

Lazard 2030 **(Formerly Lazard Sustainable Crédit 2025)** Financial year ended June 30th, 2025

Statutory auditor's report on the annual financial statements

To the Unitholders of the Lazard 2030 fund,

Opinion

In accordance with the terms of our appointment by the management company, we conducted our audit of the accompanying annual financial statements of the Undertaking for Collective Investment Lazard 2030, as a French open-end investment fund (*fonds commun de placement - FCP*), for the financial year ended June 30th, 2025.

We certify that the annual financial statements provide a true and fair view of the results of operations for the financial year under review and of the financial position and assets and liabilities of the Fund at the end of said financial year, in accordance with the accounting rules and principles generally accepted in France.

Basis of our opinion

Audit standards

We conducted our audit in accordance with the professional standards applicable in France. We believe that our audit has provided us with sufficient relevant information on which to base our opinion.

Our responsibilities under these standards are set out in the section entitled "Statutory auditor's responsibilities concerning the audit of the annual financial statements" in this report.

Independence

We conducted our audit in accordance with the rules of independence set out in the French Commercial Code and the code of ethics for statutory auditors, for the period from June 29th, 2024 to the date of issue of our report.

Findings

Without qualifying our opinion, we draw your attention to the consequences of the change in accounting methods described in the notes to the financial statements.

Basis of our opinions

In accordance with the provisions of Articles L. 821-53 and R. 823-180 of the French Commercial Code relating to the justification of our assessments, we inform you that the most important assessments we carried out, in our professional judgement, focused on the appropriateness of the accounting principles applied, notably with regard to the financial securities, and the presentation of all of the financial statements in accordance with the chart of accounts for open-end collective investment undertakings.

The assessments we have made are part of our audit of the annual financial statements as a whole and the opinion expressed above. We express no opinion on the elements of the annual financial statements taken in isolation.

Specific verifications

We have also performed, in accordance with applicable professional standards in France, the specific verifications required by the laws and regulations.

We have no matters to report regarding the true and fair presentation of the information provided in the management report prepared by the management company, or its consistency with the annual financial statements.

Responsibilities of the management company concerning the annual financial statements

It is the management company's role to draw up annual financial statements that give a fair and true picture in accordance with French accounting rules and principles and to implement the necessary internal control to be able to provide reasonable assurance that they are free from material misstatement, whether due to fraud or error.

As part of the preparation of the annual financial statements, the management company is responsible for assessing the fund's capacity to continue operating as a going concern, to present in its financial statements, where necessary, information concerning business continuity, and to apply the accounting conventions of a going concern, unless it is planned to liquidate the fund or terminate its activity.

The management company has prepared the annual financial statements.

Statutory auditor's responsibilities concerning the audit of the annual financial statements

Our role is to prepare a report on the annual financial statements and to obtain reasonable assurance that the annual financial statements as a whole are free of material misstatements. Reasonable assurance means a high but not absolute level of assurance that an audit performed in accordance with professional standards is free of material misstatement. Anomalies may stem from fraud or errors and are considered material when it can reasonably be expected that, taken individually or together, they could influence the economic decisions of users of the financial statements.

As stipulated in Article L. 821-55 of the French Commercial Code, our audit assignment does not consist in guaranteeing the viability or quality of the management of the fund.

In the context of an audit performed in accordance with professional standards applicable in France, the statutory auditor must exercise its judgement throughout the course of the audit. Moreover:

- ▶ it identifies and assess the risks that the annual financial statements may contain material misstatements, whether from fraud or error, defines and implements audit procedures to resolve these risks, and collects all elements deemed necessary and appropriate in order to give its opinion. The risk of failure to detect a material misstatement resulting from fraud is higher than that resulting from an error because fraud may involve collusion, falsification, deliberate omissions, false statements or by-passing of internal controls;
- ▶ it takes due note of the internal control relevant to the audit in order to define audit procedures that are appropriate to the circumstances, and not with a view to expressing an opinion on the efficiency of the internal control;
- ▶ it assesses the appropriateness of the accounting methods used and the reasonable nature of the accounting estimates made by the management company, and the related information provided in the annual financial statements;
- ▶ It assesses the appropriateness of the management company's application of the accounting policy for a going concern and, based on the information collected, whether there is a significant uncertainty linked to events or circumstances that is likely to call into question the fund's capacity to continue operating as a going concern. This assessment is based on the information collected up to the date of the report, bearing in mind nevertheless that subsequent circumstances or events could jeopardise the continuity of operation. If the statutory auditor observes the existence of a material uncertainty, it shall draw the attention of the readers of its report to the information provided in the annual financial statements on the subject of this uncertainty, or if this information has not been provided or is not relevant, it shall attach reservations to its certification or shall refuse to certify the accounts;

- ▶ it assesses the overall presentation of the annual financial statements and whether they provide a true picture of the underlying operations and events.

Paris-La Défense, September 8th, 2025

The statutory auditor

NOTES TO THE FINANCIAL STATEMENTS

A. General information

A1. Characteristics and activity of the open-ended UCI

A1a. Investment strategy and profile

RC H-EUR units

Obtain an annualised performance net of management fees, hedging and estimated default calculated by the management company equal to 1,60% at June 30th, 2025, by investing mainly in bonds whose issuers are companies and financial institutions. These investments are made without financial rating restriction, traded in euros and/or US dollars and/or pounds sterling, while taking into account environmental, social and governance criteria. The management company would like to point out that there is a risk that the issuer's actual financial position may turn out to be weaker than predicted; and that such unfavourable conditions (e.g., higher number of defaults, lower recovery rate) will have a negative impact on the fund's performance. As a result, it may not be possible to achieve the investment objective. The Fund seeks to take advantage of attractive actuarial yields on corporate bonds. The Fund is invested only in bonds or securities of issuers the registered offices of which are established in OECD-member countries and/or in securities listed on a financial market of one of these countries.

A2. Accounting rules and principles

The annual financial statements are for the first time presented in accordance with regulation 2020-07 of the French accounting standards body (Autorité des Normes Comptables - ANC) amended by ANC regulation 2022-03.

1 Changes in accounting methods, including presentation, in connection with the application of the new accounting regulations relating to the annual financial statements of open-ended undertakings for collective investment (amended ANC regulation 2020-07)

This new regulation requires changes in accounting methods, including changes in the presentation of the annual financial statements. Comparability with the previous year's financial statements is therefore not possible.

Note: the statements concerned are (in addition to the balance sheet and income statement): B1. Changes in shareholders' equity and financing liabilities; D5a. Appropriation of distributable income pertaining to net income and D5b. Appropriation of distributable income pertaining to net realised capital gains and losses.

Therefore, in accordance with the 2nd paragraph of Article 3 of ANC Regulation 2020-07, the financial statements do not present data for the previous financial year; the N-1 financial statements are included in the notes to the financial statements.

These changes mainly concern:

- the balance sheet structure, which is now presented by type of eligible asset and liability, including loans and borrowings;
- the structure of the income statement, which has been radically changed; the income statement includes in particular: exchange differences on financial accounts, unrealised capital gains and losses, realised capital gains and losses and transaction costs;
- the elimination of the off-balance sheet table (some of the information on the items in this table is now included in the notes to the financial statements);
- the abolition of the option to account for expenses included in the cost price (without retroactive effect for funds previously applying the inclusive expenses method);
- the distinction between convertible bonds and other bonds, and their respective accounting records;
- a new classification of target funds held in the portfolio according to the model: UCITS / AIFs / Other;
- the recognition of forward foreign exchange commitments, which is no longer done at balance sheet level but at off-balance sheet level, with information on forward foreign exchange covering a specific portion;
- the addition of information on direct and indirect exposure to different markets;
- the presentation of the inventory, which now distinguishes between eligible assets and liabilities and forward financial instruments.
- the adoption of a single presentation model for all types of UCI;
- the elimination of the aggregation of accounts for umbrella funds.

2 Accounting rules and methods applied during the year

General accounting principles apply (subject to the changes described above):

- true and fair view, comparability, business continuity,
- regularity, truthfulness,
- prudence,
- permanence of the accounting methods used each year.

Income from fixed-income securities is recorded on the basis of accrued interest.

Purchases and sales of securities are recorded excluding expenses.

The accounting currency of the portfolio is the euro.

The financial year comprises 12 months.

Asset valuation rules

1.1 Financial instruments and securities traded on a regulated market are valued at their market price. The Fund will be valued at the ask price during the subscription period and at the bid price once it is closed.

Marketable securities:

- **Shares and similar securities** are valued on the basis of the last known price on their main market.

If applicable, prices are translated into euros using the exchange rate prevailing in Paris on the valuation day (as published by WM Closing).

- **Fixed-income securities**

Fixed-income securities are for the most part marked to market based on either Bloomberg prices (BGN)® derived from averages of contributed prices, or on those of direct contributors.

There may be a discrepancy between the carrying amounts, valued as indicated above, and the actual disposal prices that would be obtained if a portion of these portfolio assets were to be sold.

- **Bonds and similar instruments** are valued on the basis of the average of the closing prices gathered from several contributors.

Financial instruments whose prices have not been determined on the valuation day or whose prices have been adjusted are valued at their probable trading value for which the management company is responsible. These estimates and their supporting documentation will be provided to the statutory auditor during audits.

However, the following instruments are valued using the following specific methods:

- **Negotiable debt securities:**

Negotiable debt securities are marked to market based on either Bloomberg prices (BVAL and/or BGN)® derived from averages of contributed prices, or on those of direct contributors.

There may be a discrepancy between the carrying amounts, valued as indicated above, and the actual disposal prices that would be obtained if a portion of these portfolio assets were to be sold.

The valuation of money market instruments complies with the provisions of Regulation (EU) 2017/1131 of June 14th, 2017. Consequently, the UCI does not use the amortised cost method.

- **UCIs:**

Units or shares of UCIs are valued at the last known net asset value.

Units or shares of UCIs for which NAVs are published monthly may be valued on the basis of interim NAVs calculated from estimated prices.

- **Temporary purchases and sales of securities**

Securities purchased under repurchase agreements are valued at their contract price using an actuarial method with a benchmark rate (overnight €STR, one- or two-week interbank rates, one- to 12-month Euribor) corresponding to the term of the contract.

Securities sold under repurchase agreements continue to be valued at their market price. Liabilities on securities sold under repurchase agreements are calculated using the same method as that used for securities purchased under repurchase agreements.

- **Futures and options:**

Futures and options are valued on the basis of intraday trading prices the timing of which is based on that of the valuation of the underlying assets.

Positions taken on the futures or options markets and over the counter are valued at their market price or at the value of the equivalent underlying asset.

1.2. Financial instruments and securities not traded on a regulated market

All of the UCI's financial instruments are traded on regulated markets.

1.3. Valuation methods for off-balance sheet commitments

Off-balance sheet transactions are valued at the commitment value.

The commitment value for futures contracts is equal to the price (in the UCI's currency) multiplied by the number of contracts multiplied by the face value.

The commitment value for options is equal to the price of the underlying security (in the UCI's currency) multiplied by the number of contracts multiplied by the delta multiplied by the face value of the underlying security.

The commitment value for swaps is equal to the face value of the contract (in the UCI's currency).

Direct exposure to credit markets: principles and rules used to break down the components of the UCI's portfolio (table C1f.) :

All components of the UCI's portfolio with direct exposure to credit markets are included in this table.

For each item, the various ratings are retrieved: issue and/or issuer rating, long-term and/or short-term rating. These ratings are obtained from three rating agencies.

The rules for determining the rating used are then:

1st level: if a rating exists for the issue, it is used rather than the issuer's rating

2nd level: the lowest long-term rating is selected from those available from the three rating agencies. If there is no long-term rating, the lowest short-term rating is used from among those available from the three rating agencies

If no rating is available, the item will be considered as "Unrated".

Lastly, according to the rating selected, the item is categorised according to market standards defining the concepts of "Investment Grade" and "Non-Investment Grade".

Management fees

Management fees are calculated on each valuation day.

- The annual management fee rate is applied to gross assets (equal to net assets before deduction of the day's management fees) using the following formula:

$$\frac{\text{Gross assets} \times \text{operating and management fees rate}}{\text{x no. of days between the calculated NAV and the previous NAV} \div 365 \text{ (or 366 in a leap year)}}$$

These amounts are then recorded in the UCI's income statement and paid in full to the management company.

The management company pays the UCI's operating fees including for:

- . financial management;
- . administration and accounting;
- . custody services;
- other operating fees:
 - . statutory auditors' fees;
 - . legal notices (Balo, Petites Affiches, etc.) if applicable.

These fees do not include transaction charges.

<i>Fees charged to the UCI</i>	<i>Basis</i>	<i>Units</i>	<i>Rate (Maximum incl. taxes)</i>	
Financial management fees	Net assets	RC H-EUR	1,200%	
		RD H-EUR	1,200%	
		PC H-EUR	0,600%	
		PD H-EUR	0,600%	
		EC H-EUR	0,400%	
		ED H-EUR	0,400%	
Operating and other service fees	Net assets	Applied to all units	0,035%	
Indirect charges (management fees and expenses)	NA	Applied to all units	None	
Turnover commission (0% to 100% received by the management company and 0% to 100% received by the custodian)	Maximum charge on each transaction	Applied to all units	Equities, convertible bonds and similar instruments and foreign exchange	None
			Futures	None
Performance fee	Net assets	RC H-EUR, RD H-EUR, PC H-EUR, PD H-EUR, EC H-EUR, ED H-EUR	None	

Only the contributions payable for the management of the UCI pursuant to Article L. 621-5-3 II 4° d) of the French Monetary and Financial Code (Code monétaire et financier) and any exceptional legal costs related to debt recovery are outside the scope of the three blocks of charges referred to in the table above.

With the exception of brokerage fees, accounting management costs and custodians' fees, all of the charges referred to above are levied as part of the joint venture arrangement between Lazard Frères Banque and Lazard Frères Gestion SAS which since 1995 has enabled them to pool their financial control, administration, and portfolio execution resources. All revenue resulting from efficient portfolio management techniques, net of direct and indirect operating costs, is returned to the UCI. All costs and expenses related to these management techniques are assumed by the UCI.

Swing Pricing

In order to protect the Fund's long-term unitholders, a swing factor will be applied to subscriptions and redemptions that have a significant impact on the Fund's outstandings, which may generate costs for unitholders entering and leaving the Fund that would otherwise have been allocated across all unitholders in the Fund. Therefore, if, on a particular NAV calculation date, the total net subscription/redemption orders of investors across all categories of Fund units exceeds a threshold predetermined by the management company on the basis of objective criteria and expressed as a percentage of the net assets in the Fund, the NAV must be adjusted upwards or downwards to take account of the readjustment costs attributable to the net subscription/redemption orders. The NAV of each unit category shall be calculated separately, but any adjustment shall have an identical impact, expressed as a percentage, on all of the NAV calculations of each unit category in the Fund. The cost parameters and trigger level shall be determined by the management company and shall be reviewed periodically, and at least every six months. These costs shall be estimated by the management company based on transaction fees, bid/offer spreads and tax charges applicable to the Fund. Insofar as this adjustment mechanism is linked to the net balance of subscriptions/redemptions within the Fund, it is not possible to accurately predict a given time in the future at which it will be applied. Consequently, neither is it possible to predict the precise frequency at which the manager company will have to make such adjustments, which shall not exceed 2% of the NAV. Investors should be aware that the volatility of the Fund's NAV may not reflect solely that of the securities in the portfolio arising from the application of swing pricing.

Appropriation of distributable income

Definition of distributable income:

Distributable income consists of:

Income:

Net income plus retained earnings and plus or minus the balance of the income adjustment account.

Capital gains and losses:

Realised capital gains, net of expenses, less realised capital losses, net of expenses, recognised for the financial year, plus any net capital gains of the same kind recognised over previous years that have not been distributed or accumulated, plus or minus the balance of the capital gains adjustment account.

The amounts referred to as "income" and "capital gains and losses" may be distributed independently of each other, in whole or in part.

Distributable income is paid out no later than five months after the end of the financial year.

Where the UCI is authorised under Regulation (EU) 2017/1131 of the European Parliament and of the Council of June 14th, 2017 on money market funds, by way of derogation from the provisions of I, distributable income may also include unrealised capital gains.

Appropriation of distributable income:

NOTES TO THE ANNUAL FINANCIAL STATEMENTS

1. Accounting rules and principles

The annual financial statements are presented in accordance with regulation 2014-01, as amended, of the French accounting standards body (Autorité des Normes Comptables - ANC).

The general accounting principles apply:

- true and fair view, comparability, business continuity,
- regularity, truthfulness,
- prudence,
- permanence of the accounting methods used each year.

Income from fixed-income securities is recorded on the basis of accrued interest.

Purchases and sales of securities are recorded excluding expenses.

The accounting currency of the portfolio is the euro.

The financial year comprises 12 months.

Asset valuation rules

1.1 Financial instruments and securities traded on a regulated market are valued at their market price. The Fund will be valued at the ask price during the subscription period and at the bid price once it is closed.

Marketable securities:

• **Shares and similar securities** are valued on the basis of the last known price on their main market.

If applicable, prices are translated into euros using the exchange rate prevailing in Paris on the valuation day (as published by WM Closing).

• Fixed-income securities

Fixed-income securities are for the most part marked to market based on either Bloomberg prices (BGN)® derived from averages of contributed prices, or on those of direct contributors.

There may be a discrepancy between the carrying amounts, valued as indicated above, and the actual disposal prices that would be obtained if a portion of these portfolio assets were to be sold.

• **Bonds and similar instruments** are valued on the basis of the average of the closing prices gathered from several contributors.

Financial instruments whose prices have not been determined on the valuation day or whose prices have been adjusted are valued at their probable trading value for which the management company is responsible. These valuations and the related supporting documentation will be provided to the statutory auditor during audits.

However, the following instruments are valued using the following specific methods:

• Negotiable debt securities:

Negotiable debt securities are marked to market based on either Bloomberg prices (BVAL and/or BGN)® derived from averages of contributed prices, or on those of direct contributors.

There may be a discrepancy between the carrying amounts, valued as indicated above, and the actual disposal prices that would be obtained if a portion of these portfolio assets were to be sold.

The valuation of money market instruments complies with the provisions of Regulation (EU) 2017/1131 of June 14th, 2017. Consequently, the UCI does not use the amortised cost method.

• **UCIs:** Units or shares of UCIs are valued at the last known net asset value. Units or shares of UCIs for which NAVs are published monthly may be valued on the basis of interim NAVs calculated from estimated prices.

• Temporary purchases and sales of securities

Securities purchased under repurchase agreements are valued at their contract price using an actuarial method with a benchmark rate (overnight €STR, one- or two-week interbank rates, one- to 12-month Euribor) corresponding to the term of the contract.

- Securities sold under repurchase agreements continue to be valued at their market price. Liabilities on securities sold under repurchase agreements are calculated using the same method as that used for securities purchased under repurchase agreements.

• **Futures and options**

- Futures and options are valued on the basis of intraday trading prices the timing of which is based on that of the valuation of the underlying assets.

Positions taken on the futures or options markets and over the counter are valued at their market price or at the value of the equivalent underlying asset.

1.2. Financial instruments and securities not traded on a regulated market All of the UCI's financial instruments are traded on regulated markets.

1.3. Valuation methods for off-balance sheet commitments

- Off-balance sheet transactions are valued at the commitment value.

- The commitment value for futures contracts is equal to the price (in the UCI's currency) multiplied by the number of contracts multiplied by the face value.

- The commitment value for options is equal to the price of the underlying security (in the UCI's currency) multiplied by the number of contracts multiplied by the delta multiplied by the face value of the underlying security.

- The commitment value for swaps is equal to the face value of the contract (in the UCI's currency).

Management fees

- Management fees are calculated on each valuation day.

- The annual management fee rate is applied to gross assets (equal to net assets before deduction of the day's management fees) using the following formula:

Gross assets

x operating and management fees rate

x no. of days between the calculated NAV and the previous NAV

365 (or 366 in a leap year)

- These amounts are then recorded in the UCI's income statement and paid in full to the management company.

- The management company pays the UCI's operating fees, including for:

. financial management;

. administration and accounting;

. custody services;

. other operating fees:

. statutory auditors' fees;

. legal notices (Balo, Petites Affiches, etc.) if applicable.

These fees do not include transaction charges.

Fees charged to the UCI	Basis	Units	Maximum rate (incl. taxes)	
Financial management fees	Net assets	RC H-EUR	1,200%	
		RD H-EUR	1,200%	
		PC H-EUR	0,600%	
		PD H-EUR	0,600%	
		EC H-EUR	0,400%	
		ED H-EUR	0,400%	
Operating and other service fees	Net assets	Applied to all units	0,035%	
Indirect charges (management fees and expenses)	NA	Applied to all units	None	
Turnover commission (0% to 100% received by the management company and 0% to 100% received by the custodian)	Maximum charge on each transaction	Applied to all units	Equities, convertible bonds and similar instruments and foreign exchange	None
			Futures	None
Performance fees	Net assets	RC H-EUR, RD HEUR, PC H-EUR, PD H-EUR, EC HEUR, ED H-EUR	None	

• **Transaction charges**

Transactions are recorded excluding charges.

• **Retrocessions received on management fees or entry charges**

The method used to calculate retrocession amounts is set out in the sales and marketing agreements.

- If the amount is significant, a provision is recognised in account 61719.

The final amount is recognised upon settlement of invoices after reversal of any provisions.

Method related to swing pricing adjustments to net asset value (NAV) with a trigger level:

In order to protect the fund's long-term unitholders, a swing factor will be applied to subscriptions and redemptions that have a significant impact on the UCI's outstandings, which may generate costs for unitholders entering and leaving the UCI that would otherwise have been allocated across all unitholders in the fund. Therefore, if, on a particular NAV calculation date, the total net subscription/redemption orders of investors across all categories of Fund units exceeds a threshold predetermined by the management company on the basis of objective criteria and expressed as a percentage of the net assets in the Fund, the NAV must be adjusted upwards or downwards to take account of the readjustment costs attributable to the net subscription/redemption orders. The NAV of each unit category shall be calculated separately, but any adjustment shall have an identical impact, expressed as a percentage, on all of the NAV calculations of each unit class in the UCI.

The cost parameters and trigger level shall be determined by the management company and shall be reviewed periodically, and at least every six months. These costs shall be estimated by the management company based on transaction fees, bid/offer spreads and tax charges applicable to the UCI. Insofar as this adjustment mechanism is linked to the net balance of subscriptions/redemptions within the Fund, it is not possible to accurately predict a given time in the future at which it will be applied. Consequently, neither is it possible to predict the precise frequency at which the manager company will have to make such adjustments, which shall not exceed 2% of the NAV. Investors should be aware that the volatility of the UCI's NAV may not reflect solely that of the securities in the portfolio arising from the application of swing pricing.

Appropriation of distributable income***Definition of distributable income:***

Distributable income consists of:

Net income:

net income plus retained earnings, plus or minus the balance of the revenue adjustment account. Net income for the financial year is equal to the amount of interest, arrears, dividends, bonuses and prizes, remuneration and all income generated by the securities that make up the UCI's portfolio, plus income generated by temporary cash holdings and minus management fees and borrowing costs.

Capital gains and losses:

Realised capital gains, net of expenses, less realised capital losses, net of expenses, recognised for the financial year, plus any net capital gains of the same kind recognised over previous years that have not been distributed or accumulated, plus or minus the balance of the capital gains adjustment account.

Appropriation of distributable income:

<i>Unit(s)</i>	<i>Appropriation of net income</i>	<i>Appropriation of net realised capital gains or losses</i>

This document contains key information about the investment product. It is not a sales document. This information is required by law to help you understand the nature and potential risks, costs, gains and losses of this product and to help you compare it to other products.

PRODUCT

Product name:	Lazard Sustainable Crédit 2025 - RC H-EUR units
ISIN code:	FR0013444924
PRIIPS Initiator:	LAZARD FRERES GESTION SAS
Website:	www.lazardfreresgestion.fr
Contact:	Call +33 (0)1 44 13 01 79 for more information
Competent authority:	The French Financial Markets Authority (Autorité des Marchés Financiers- AMF) is responsible for supervising LAZARD FRERES GESTION SAS with regard to this key information document. LAZARD FRERES GESTION SAS is approved in France under no. GP-04000068 and regulated by the AMF.
Country of authorisation and approval:	AMF.
Date of production of the key information document:	06/08/2024

WHAT DOES THIS PRODUCT CONSIST OF?

Type: Undertaking for Collective Investment in Transferable Securities (UCITS), Mutual Fund (FCP)

Term: The UCI's term is 99 years, commencing from 10/12/2019, except in the event that the Fund is dissolved before the end of the term or extended pursuant to the regulations.

Objectives:

Obtain an annualised performance net of management fees, hedging and estimated default calculated by the management company equal to 1,60% at June 30th, 2025, by investing mainly in bonds whose issuers are companies and financial institutions. These investments are made without financial rating restriction, traded in euros and/or US dollars and/or pounds sterling, while taking into account environmental, social and governance criteria. The management company would like to point out that there is a risk that the issuer's actual financial position may turn out to be weaker than predicted; and that such unfavourable conditions (e.g., higher number of defaults, lower recovery rate) will have a negative impact on the fund's performance. As a result, it may not be possible to achieve the investment objective. The Fund seeks to take advantage of attractive actuarial yields on corporate bonds. The Fund is invested only in bonds or securities of issuers the registered offices of which are established in OECD-member countries and/or in securities listed on a financial market of one of these countries.

The Fund's investment strategy is mainly based on a carry approach. Nevertheless, the manager has leeway to actively manage the portfolio by selling and buying securities. The fund's turnover rate will therefore be low. As an exception to the 5%-10%-40% ratios, the management team may invest more than 35% of the UCI's net assets in securities guaranteed by an EEA Member State or the United States. The UCI promotes environmental and/or social characteristics within the meaning of Article 8 of Regulation (EU) 2019/2088, the so-called "SFDR". The consideration of ESG criteria impacts the overall structure of the portfolio by investing exclusively in bonds with an initiated, convincing or advanced ESG profile according to our ESG partner. This approach excludes at least 20% of the Fund's investment universe. The modified duration will be between 0 and 5,5.

The investment strategy consists, based on this ESG investment universe, in applying a quantitative filter to isolate bonds that fit the Fund's investment strategy through the appropriate liquidity levels (sufficient amount in circulation), first end maturity date or early repayment date (before June 30th, 2025), and issuance currency. To build his portfolio, the portfolio manager conducts his own qualitative analysis of the bonds. It also refers to agency ratings but does not rely on them solely and mechanically.

As the bonds in the portfolio reach maturity and are redeemed, the manager may reinvest in:

- bonds whose maturities (end maturity or the issuer or holder's repayment options) fall on or before June 30th, 2025,
- debt securities (maturing no later than June 30th, 2025) or money market instruments and up to 100% of the Fund's assets. The manager may also invest in additional Tier 1 contingent convertible bonds (CoCos) up to a maximum of 35 % of the net assets. The securities will be denominated in euros, US dollars and pounds sterling and will be hedged against foreign exchange risk with a residual foreign exchange risk of a maximum of 5% of the Fund's net assets.

The Fund may invest up to the amount of the net assets in forward financial instruments traded on French or foreign regulated, organised or over-the-counter markets. The manager may take positions in futures contracts or forward exchange contracts solely with a view to hedging the portfolio against foreign exchange risk.

Allocation of distributable income:

- Allocation of net income: Accumulation
- Allocation of net realised capital gains: Accumulation

Right of redemption: Orders are executed in accordance with the table below

Business day	Day of establishment of the NAV (D)	The business day following the valuation day (D+1)	Two business days following the valuation day (D+2)
Daily receipt of orders and daily centralisation of subscription and redemption orders before 12:00 a.m. (Paris time)	Execution of the order at the latest on D	Publication of the net asset value (NAV)	Settlement of redemption orders

Targeted retail investors: This product may be suitable for retail investors with a limited level of knowledge of financial markets and products who seek exposure to bonds and other international debt securities and who accept the risk of losing part of the invested capital. The UCI may not be offered or sold in the United States. For further information, please refer to section "11. Eligible subscribers and typical investor profile" in the prospectus.

Recommendation: This Fund may not be suitable for investors planning to withdraw their investment within three years.

Name of custodian: CACEIS BANK

Where/how to obtain information on the UCI:

All other practical information on this product, including the latest unit price, the prospectus, the latest annual and periodic reports, the composition of assets and the standards of LAZARD FRERES GESTION SAS with regard to the exercise of voting rights, as well as the report on the exercise of voting rights, will be sent out within eight working days upon written request to LAZARD FRERES GESTION SAS - 25, rue de Courcelles, 75008 Paris, France.

WHAT ARE THE RISKS AND WHAT RETURN COULD I GET?

Risk indicator:

Recommended holding period:

3 years

The risk indicator assumes that you keep the product for 3 years. The actual risk may be very different if you opt to exit before the end of the recommended holding period, and you may get less in return.

Other sizeable risks not taken into account in the indicator:

- Credit risk
- Derivatives risk
- NOTE: this UCI may invest 100% of its assets in issues of debt securities with low credit quality and entails very high credit risk.

The synthetic risk indicator is used to assess the risk level of this product compared with others. It indicates the probability that this product will incur losses in the event of market movements or if we are unable to pay you. We have classified this product in risk class 3 of 7, which is a risk class between low and medium. In other words, the potential losses linked to the future results of the product are at a low to medium level and, if the situation were to deteriorate on the markets, it is unlikely that the ability of LAZARD FRERES GESTION SAS to pay you would be affected. As this product does not provide protection against market risks, you could lose all or part of your investment.

Performance scenarios:

The figures shown include all costs of the product itself, but not necessarily all fees due to your advisor or distributor. These figures do not take into account your personal tax situation, which may also affect the amounts you will receive.

What you will get from this product depends on future market performance. Future market developments are random and cannot be accurately predicted.

The unfavourable, intermediate and favourable scenarios presented represent examples using best and worst case performance, as well as the average performance of the product and of a benchmark index over the past 10 years. Markets could evolve very differently in the future.

Recommended holding period: 3 years Investment example: €10 000			
Scenarios		If you exit after 1 year	If you exit after 3 years
Minimum	There is no guaranteed minimum return. You could lose all or part of your investment.		
Stress	What you could get after deducting costs	3 730 €	7 520 €
	Average annual return	-62,7%	-9,1%
Adverse	What you could get after deducting costs	8 420 €	8 260 €
	Average annual return	-15,8%	-6,2%
Interim	What you could get after deducting costs	9 990 €	10 090 €
	Average annual return	-0,1%	0,3%
Favourable	What you could get after deducting costs	12 210 €	10 320 €
	Average annual return	22,1%	1,0%

The stress scenario shows what you could get in extreme market situations.

Adverse scenario: This type of scenario occurred for an investment between 30/03/2019 and 30/03/2020

Interim scenario: This type of scenario occurred for an investment between 30/06/2016 and 30/06/2017

Favourable scenario: This type of scenario occurred for an investment between 30/03/2020 and 30/03/2021

WHAT HAPPENS IF LAZARD FRERES GESTION SAS IS UNABLE TO MAKE PAYMENTS?

The product is a co-ownership of financial instruments and deposits separate from the portfolio management company. In the event of default by the latter, the assets of the product held by the custodian will not be affected. In the event of default by the custodian, the risk of financial loss to the product is mitigated by the legal segregation of the assets of the custodian from those of the product.

WHAT WILL THIS INVESTMENT COST ME?

The person who sells you this product or who gives you advice about it may ask you to pay additional costs. If so, this person will inform you about these costs and show you the impact of these costs on your investment.

Costs over time:

The tables show the amounts deducted from your investment to cover the different types of costs. These amounts depend on the amount you invest, how long you hold the product and the performance of the product. The amounts shown here are illustrations based on an example of an investment amount and different possible investment periods.

We have assumed that:

- in the first year you will get back the amount you invested (annual return of 0%)

- for the other holding periods, the product evolves as indicated in the intermediate scenario
- €10 000 is invested

	If you exit after 1 year	If you exit after 3 years
Total costs	227 €	494 €
Impact of annual costs	2,3%	1,6% each year

(*) It shows how costs reduce your return annually over the holding period. For example, it shows that if you exit at the end of the recommended holding period, your average return per year is expected to be 1,9% before deduction of costs and 0,3% after deduction of costs.

Breakdown of costs:

One-off costs at entry or exit		If you exit after 1 year
Entry costs	1,00% of the amount invested. This is the maximum amount you could be required to pay. The person selling you the product will inform you of the actual costs.	Up to €100
Exit costs	We do not charge exit costs.	0 €
Recurring costs incurred each year		
Management fees and other administrative and operating costs	1,25% of the value of your investment per year. This estimate is based on actual costs over the past year.	124 €
Transaction costs	0,03% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the investments underlying the product. The actual amount varies depending on how much we buy and sell.	3 €
Incidental costs incurred under specific conditions		
Performance-related fees	There is no performance fee for this product.	0 €

HOW LONG DO I HAVE TO KEEP IT AND CAN I WITHDRAW MONEY EARLY?

Recommended holding period: 3 years

This product does not have a minimum holding period requirement. The recommended holding period (3 years) has been calculated to be consistent with the product's investment objective.

You may withdraw your investment before the end of the recommended holding period, without any charges or penalties under the conditions set out in the "Right of redemption" section. The risk profile of the product may be very different if you opt to exit before the end of the recommended holding period.

HOW CAN I MAKE A COMPLAINT?

Any complaints regarding this product can be addressed to the Legal Department of LAZARD FRERES GESTION SAS:

By post: LAZARD FRERES GESTION SAS - 25, rue de Courcelles 75008 Paris France

By email: lfg.juridique@lazard.fr

A description of the complaint handling process is available on our website at www.lazardfreresgestion.fr.

OTHER RELEVANT INFORMATION

The UCI falls under Article 8 of Regulation (EU) 2019/2088, the Sustainable Finance Disclosure Regulation (SFDR).

You can obtain more information on this product on the website of LAZARD FRERES GESTION SAS. A paper copy will be made available free of charge upon written request to LAZARD FRERES GESTION SAS - 25, rue de Courcelles 75008 Paris France. You can also find information on the product's performance over the past years and performance scenario calculations at https://www.lazardfreresgestion.fr/FR/Fiche-fonds_93.html?idFond=ST3 Where this product is used as a unit-linked vehicle for a life insurance or capitalisation contract, additional information about this contract, such as the costs of the contract, which are not included in the costs indicated in this document, the contract in the event of a claim and what happens in the event of default of the insurance company, are presented in the key information document of this contract which must be provided by your insurer or broker or any other insurance intermediary in accordance with their legal obligation. If you disagree with a response to a complaint, you may choose to contact the AMF Ombudsman (Autorité des Marchés Financiers - 17 place de la Bourse, 75082 Paris Cedex 02), once you have exhausted all internal appeal procedures. The form for requesting mediation from the AMF and the mediation charter are available on the website <http://www.amf-france.org>.

In your UCI, there is a redemption cap ("Gates"). Please refer to point 15 of the prospectus.

WHAT DOES THIS PRODUCT CONSIST OF?

Type: Undertaking for Collective Investment in Transferable Securities (UCITS), Mutual Fund (FCP)

Term: The UCI's term is 99 years, commencing from 10/12/2019, except in the event that the Fund is dissolved before the end of the term or extended pursuant to the regulations.

Objectives:

Obtain an annualised performance net of management fees, hedging and estimated default calculated by the management company equal to 2,20% at June 30th, 2025, by investing mainly in bonds whose issuers are companies and financial institutions. These investments are made without financial rating constraints, traded in euros and/or US dollars and/or pounds sterling, while taking environmental, social and governance criteria into account. The management company would like to point out that there is a risk that the issuer's actual financial position may turn out to be weaker than predicted; and that such unfavourable conditions (e.g., higher number of defaults, lower recovery rate) will have a negative impact on the fund's performance. As a result, it may not be possible to achieve the investment objective. The Fund seeks to take advantage of attractive actuarial yields on corporate bonds. The Fund is invested only in bonds or securities of issuers the registered offices of which are established in OECD-member countries and/or in securities listed on a financial market of one of these countries.

The Fund's investment strategy is mainly based on a carry approach. Nevertheless, the manager has leeway to actively manage the portfolio by selling and buying securities. The fund's turnover rate will therefore be low. As an exception to the 5%-10%-40% ratios, the management team may invest more than 35% of the UCI's net assets in securities guaranteed by an EEA Member State or the United States. The UCI promotes environmental and/or social characteristics within the meaning of Article 8 of Regulation (EU) 2019/2088, the so-called "SFDR". The consideration of ESG criteria impacts the overall structure of the portfolio by investing exclusively in bonds with an initiated, convincing or advanced ESG profile according to our ESG partner. This approach excludes at least 20% of the Fund's investment universe. The modified duration will be between 0 and 5,5.

The investment strategy consists, based on this ESG investment universe, in applying a quantitative filter to isolate bonds that fit the Fund's investment strategy through the appropriate liquidity levels (sufficient amount in circulation), first end maturity date or early repayment date (before June 30th, 2025), and issuance currency. To build his portfolio, the portfolio manager conducts his own qualitative analysis of the bonds. It also refers to agency ratings but does not rely on them solely and mechanically.

As the bonds in the portfolio reach maturity and are redeemed, the manager may reinvest in:

- bonds whose maturities (end maturity or the issuer or holder's repayment options) fall on or before June 30th, 2025,
- debt securities (maturing no later than June 30th, 2025) or money market instruments and up to 100% of the Fund's assets. The manager may also invest in additional Tier 1 contingent convertible bonds (CoCos) up to a maximum of 35 % of the net assets. The securities will be denominated in euros, US dollars and pounds sterling and will be hedged against foreign exchange risk with a residual foreign exchange risk of a maximum of 5% of the Fund's net assets.

The Fund may invest up to the amount of the net assets in forward financial instruments traded on French or foreign regulated, organised or over-the-counter markets. The manager may take positions in futures contracts or forward exchange contracts solely with a view to hedging the portfolio against foreign exchange risk.

Allocation of distributable income:

- Allocation of net income: Accumulation
- Allocation of net realised capital gains: Accumulation

Right of redemption: Orders are executed in accordance with the table below

Business day	Day of establishment of the NAV (D)	The business day following the valuation day (D+1)	Two business days following the valuation day (D+2)
Daily receipt of orders and daily centralisation of subscription and redemption orders before 12:00 a.m. (Paris time)	Execution of the order at the latest on D	Publication of the net asset value (NAV)	Settlement of redemption orders

Targeted retail investors: This product may be suitable for retail investors with a limited level of knowledge of financial markets and products who seek exposure to bonds and other international debt securities and who accept the risk of losing part of the invested capital. The UCI may not be offered or sold in the United States. For further information, please refer to section "11. Eligible subscribers and typical investor profile" in the prospectus.

Recommendation: This Fund may not be suitable for investors planning to withdraw their investment within three years.

Name of custodian: CACEIS BANK

Where/how to obtain information on the UCI:

All other practical information on this product, including the latest unit price, the prospectus, the latest annual and periodic reports, the composition of assets and the standards of LAZARD FRERES GESTION SAS with regard to the exercise of voting rights, as well as the report on the exercise of voting rights, will be sent out within eight working days upon written request to LAZARD FRERES GESTION SAS - 25, rue de Courcelles, 75008 Paris, France.

WHAT ARE THE RISKS AND WHAT RETURN COULD I GET?

Risk indicator:

Recommended holding period:

3 years

The risk indicator assumes that you keep the product for 3 years. The actual risk may be very different if you opt to exit before the end of the recommended holding period, and you may get less in return.

Other sizeable risks not taken into account in the indicator:

- Credit risk
- Derivatives risk
- NOTE: this UCI may invest 100% of its assets in issues of debt securities with low credit quality and entails very high credit risk.

The synthetic risk indicator is used to assess the risk level of this product compared with others. It indicates the probability that this product will incur losses in the event of market movements or if we are unable to pay you. We have classified this product in risk class 3 of 7, which is a risk class between low and medium. In other words, the potential losses linked to the future results of the product are at a low to medium level and, if the situation were to deteriorate on the markets, it is unlikely that the ability of LAZARD FRERES GESTION SAS to pay you would be affected. As this product does not provide protection against market risks, you could lose all or part of your investment.

Performance scenarios:

The figures shown include all costs of the product itself, but not necessarily all fees due to your advisor or distributor. These figures do not take into account your personal tax situation, which may also affect the amounts you will receive.

What you will get from this product depends on future market performance. Future market developments are random and cannot be accurately predicted.

The unfavourable, intermediate and favourable scenarios presented represent examples using best and worst case performance, as well as the average performance of the product and of a benchmark index over the past 10 years. Markets could evolve very differently in the future.

Recommended holding period: 3 years Investment example: €10 000			
Scenarios		If you exit after 1 year	If you exit after 3 years
Minimum	There is no guaranteed minimum return. You could lose all or part of your investment.		
Stress	What you could get after deducting costs	3 740 €	7 520 €
	Average annual return	-62,6%	-9,1%
Adverse	What you could get after deducting costs	8 430 €	8 270 €
	Average annual return	-15,7%	-6,1%
Interim	What you could get after deducting costs	9 990 €	10 110 €
	Average annual return	-0,1%	0,4%
Favourable	What you could get after deducting costs	12 300 €	10 490 €
	Average annual return	23,0%	1,6%

The stress scenario shows what you could get in extreme market situations.

Adverse scenario: This type of scenario occurred for an investment between 30/03/2019 and 30/03/2020

Interim scenario: This type of scenario occurred for an investment between 30/06/2016 and 30/06/2017

Favourable scenario: This type of scenario occurred for an investment between 30/03/2020 and 30/03/2021

WHAT HAPPENS IF LAZARD FRERES GESTION SAS IS UNABLE TO MAKE PAYMENTS?

The product is a co-ownership of financial instruments and deposits separate from the portfolio management company. In the event of default by the latter, the assets of the product held by the custodian will not be affected. In the event of default by the custodian, the risk of financial loss to the product is mitigated by the legal segregation of the assets of the custodian from those of the product.

WHAT WILL THIS INVESTMENT COST ME?

The person who sells you this product or who gives you advice about it may ask you to pay additional costs. If so, this person will inform you about these costs and show you the impact of these costs on your investment.

Costs over time:

The tables show the amounts deducted from your investment to cover the different types of costs. These amounts depend on the amount you invest, how long you hold the product and the performance of the product. The amounts shown here are illustrations based on an example of an investment amount and different possible investment periods.

We have assumed that:

- in the first year you will get back the amount you invested (annual return of 0%)

- for the other holding periods, the product evolves as indicated in the intermediate scenario
- €10 000 is invested

	If you exit after 1 year	If you exit after 3 years
Total costs	168 €	309 €
Impact of annual costs	1,7%	1,0% each year

(*) It shows how costs reduce your return annually over the holding period. For example, it shows that if you exit at the end of the recommended holding period, your average return per year is expected to be 1,4% before deduction of costs and 0,4% after deduction of costs.

Breakdown of costs:

One-off costs at entry or exit		If you exit after 1 year
Entry costs	1,00% of the amount invested. This is the maximum amount you could be required to pay. The person selling you the product will inform you of the actual costs.	Up to €100
Exit costs	We do not charge exit costs.	0 €
Recurring costs incurred each year		
Management fees and other administrative and operating costs	0,65% of the value of your investment per year. This estimate is based on actual costs over the past year.	65 €
Transaction costs	0,03% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the investments underlying the product. The actual amount varies depending on how much we buy and sell.	3 €
Incidental costs incurred under specific conditions		
Performance-related fees	There is no performance fee for this product.	0 €

HOW LONG DO I HAVE TO KEEP IT AND CAN I WITHDRAW MONEY EARLY?

Recommended holding period: 3 years

This product does not have a minimum holding period requirement. The recommended holding period (3 years) has been calculated to be consistent with the product's investment objective.

You may withdraw your investment before the end of the recommended holding period, without any charges or penalties under the conditions set out in the "Right of redemption" section. The risk profile of the product may be very different if you opt to exit before the end of the recommended holding period.

HOW CAN I MAKE A COMPLAINT?

Any complaints regarding this product can be addressed to the Legal Department of LAZARD FRERES GESTION SAS:

By post: LAZARD FRERES GESTION SAS - 25, rue de Courcelles 75008 Paris France

By email: lfg.juridique@lazard.fr

A description of the complaint handling process is available on our website at www.lazardfreresgestion.fr.

OTHER RELEVANT INFORMATION

The UCI falls under Article 8 of Regulation (EU) 2019/2088, the Sustainable Finance Disclosure Regulation (SFDR).

You can obtain more information on this product on the website of LAZARD FRERES GESTION SAS. A paper copy will be made available free of charge upon written request to LAZARD FRERES GESTION SAS - 25, rue de Courcelles 75008 Paris France. You can also find information on the product's performance over the past years and performance scenario calculations at https://www.lazardfreresgestion.fr/FR/Fiche-fonds_93.html?idFond=ST1 Where this product is used as a unit-linked vehicle for a life insurance or capitalisation contract, additional information about this contract, such as the costs of the contract, which are not included in the costs indicated in this document, the contract in the event of a claim and what happens in the event of default of the insurance company, are presented in the key information document of this contract which must be provided by your insurer or broker or any other insurance intermediary in accordance with their legal obligation. If you disagree with a response to a complaint, you may choose to contact the AMF Ombudsman (Autorité des Marchés Financiers - 17 place de la Bourse, 75082 Paris Cedex 02), once you have exhausted all internal appeal procedures. The form for requesting mediation from the AMF and the mediation charter are available on the website <http://www.amf-france.org>.

In your UCI, there is a redemption cap ("Gates"). Please refer to point 15 of the prospectus.

Competent authority:	The French Financial Markets Authority (Autorité des Marchés Financiers- AMF) is responsible for supervising LAZARD FRERES GESTION SAS with regard to this key information document. LAZARD FRERES GESTION SAS is approved in France under no. GP-04000068 and regulated by the AMF.
Country of authorisation and approval:	LAZARD FRERES GESTION SAS is approved in France under no. GP-04000068 and regulated by the AMF.
Date of production of the key information document:	06/08/2024

WHAT DOES THIS PRODUCT CONSIST OF?

Type: Undertaking for Collective Investment in Transferable Securities (UCITS), Mutual Fund (FCP)

Term: The UCI's term is 99 years, commencing from 10/12/2019, except in the event that the Fund is dissolved before the end of the term or extended pursuant to the regulations.

Objectives:

Obtain an annualised performance net of management fees, hedging and estimated default calculated by the management company equal to 2,20% at June 30th, 2025, by investing mainly in bonds whose issuers are companies and financial institutions. These investments are made without financial rating constraints, traded in euros and/or US dollars and/or pounds sterling, while taking environmental, social and governance criteria into account. The management company would like to point out that there is a risk that the issuer's actual financial position may turn out to be weaker than predicted; and that such unfavourable conditions (e.g., higher number of defaults, lower recovery rate) will have a negative impact on the fund's performance. As a result, it may not be possible to achieve the investment objective. The Fund seeks to take advantage of attractive actuarial yields on corporate bonds. The Fund is invested only in bonds or securities of issuers the registered offices of which are established in OECD-member countries and/or in securities listed on a financial market of one of these countries.

The Fund's investment strategy is mainly based on a carry approach. Nevertheless, the manager has leeway to actively manage the portfolio by selling and buying securities. The fund's turnover rate will therefore be low. As an exception to the 5%-10%-40% ratios, the management team may invest more than 35% of the UCI's net assets in securities guaranteed by an EEA Member State or the United States. The UCI promotes environmental and/or social characteristics within the meaning of Article 8 of Regulation (EU) 2019/2088, the so-called "SFDR". The consideration of ESG criteria impacts the overall structure of the portfolio by investing exclusively in bonds with an initiated, convincing or advanced ESG profile according to our ESG partner. This approach excludes at least 20% of the Fund's investment universe. The modified duration will be between 0 and 5,5.

The investment strategy consists, based on this ESG investment universe, in applying a quantitative filter to isolate bonds that fit the Fund's investment strategy through the appropriate liquidity levels (sufficient amount in circulation), first end maturity date or early repayment date (before June 30th, 2025), and issuance currency. To build his portfolio, the portfolio manager conducts his own qualitative analysis of the bonds. It also refers to agency ratings but does not rely on them solely and mechanically.

As the bonds in the portfolio reach maturity and are redeemed, the manager may reinvest in:

- bonds whose maturities (end maturity or the issuer or holder's repayment options) fall on or before June 30th, 2025,
- debt securities (maturing no later than June 30th, 2025) or money market instruments and up to 100% of the Fund's assets. The manager may also invest in additional Tier 1 contingent convertible bonds (CoCos) up to a maximum of 35 % of the net assets. The securities will be denominated in euros, US dollars and pounds sterling and will be hedged against foreign exchange risk with a residual foreign exchange risk of a maximum of 5% of the Fund's net assets.

The Fund may invest up to the amount of the net assets in forward financial instruments traded on French or foreign regulated, organised or over-the-counter markets. The manager may take positions in futures contracts or forward exchange contracts solely with a view to hedging the portfolio against foreign exchange risk.

Allocation of distributable income:

- Allocation of net income: Distribution and/or retention
- Allocation of net realised capital gains: Accumulation and/or Distribution and/or Retention

Right of redemption: Orders are executed in accordance with the table below

Business day	Day of establishment of the NAV (D)	The business day following the valuation day (D+1)	Two business days following the valuation day (D+2)
Daily receipt of orders and daily centralisation of subscription and redemption orders before 12:00 a.m. (Paris time)	Execution of the order at the latest on D	Publication of the net asset value (NAV)	Settlement of redemption orders

Targeted retail investors: This product may be suitable for retail investors with a limited level of knowledge of financial markets and products who seek exposure to bonds and other international debt securities and who accept the risk of losing part of the invested capital.

The UCI may not be offered or sold in the United States. For further information, please refer to section "11. Eligible subscribers and typical investor profile" in the prospectus.

Recommendation: This Fund may not be suitable for investors planning to withdraw their investment within three years.

Name of custodian: CACEIS BANK

WHAT DOES THIS PRODUCT CONSIST OF?

Type: Undertaking for Collective Investment in Transferable Securities (UCITS), Mutual Fund (FCP)

Term: The UCI's term is 99 years, commencing from 10/12/2019, except in the event that the Fund is dissolved before the end of the term or extended pursuant to the regulations.

Objectives:

Obtain an annualised performance net of management fees, hedging and estimated default calculated by the management company equal to 2,40% at June 30th, 2025, by investing mainly in bonds whose issuers are companies and financial institutions. These investments are made without financial rating constraints, traded in euros and/or US dollars and/or pounds sterling, while taking environmental, social and governance criteria into account. The management company would like to point out that there is a risk that the issuer's actual financial position may turn out to be weaker than predicted; and that such unfavourable conditions (e.g., higher number of defaults, lower recovery rate) will have a negative impact on the fund's performance. As a result, it may not be possible to achieve the investment objective. The Fund seeks to take advantage of attractive actuarial yields on corporate bonds. The Fund is invested only in bonds or securities of issuers the registered offices of which are established in OECD-member countries and/or in securities listed on a financial market of one of these countries.

The Fund's investment strategy is mainly based on a carry approach. Nevertheless, the manager has leeway to actively manage the portfolio by selling and buying securities. The fund's turnover rate will therefore be low. As an exception to the 5%-10%-40% ratios, the management team may invest more than 35% of the UCI's net assets in securities guaranteed by an EEA Member State or the United States. The UCI promotes environmental and/or social characteristics within the meaning of Article 8 of Regulation (EU) 2019/2088, the so-called "SFDR". The consideration of ESG criteria impacts the overall structure of the portfolio by investing exclusively in bonds with an initiated, convincing or advanced ESG profile according to our ESG partner. This approach excludes at least 20% of the Fund's investment universe. The modified duration will be between 0 and 5,5.

The investment strategy consists, based on this ESG investment universe, in applying a quantitative filter to isolate bonds that fit the Fund's investment strategy through the appropriate liquidity levels (sufficient amount in circulation), first end maturity date or early repayment date (before June 30th, 2025), and issuance currency. To build his portfolio, the portfolio manager conducts his own qualitative analysis of the bonds. It also refers to agency ratings but does not rely on them solely and mechanically.

As the bonds in the portfolio reach maturity and are redeemed, the manager may reinvest in:

- bonds whose maturities (end maturity or the issuer or holder's repayment options) fall on or before June 30th, 2025,
- debt securities (maturing no later than June 30th, 2025) or money market instruments and up to 100% of the Fund's assets. The manager may also invest in additional Tier 1 contingent convertible bonds (CoCos) up to a maximum of 35 % of the net assets. The securities will be denominated in euros, US dollars and pounds sterling and will be hedged against foreign exchange risk with a residual foreign exchange risk of a maximum of 5% of the Fund's net assets.

The Fund may invest up to the amount of the net assets in forward financial instruments traded on French or foreign regulated, organised or over-the-counter markets. The manager may take positions in futures contracts or forward exchange contracts solely with a view to hedging the portfolio against foreign exchange risk.

Allocation of distributable income:

- Allocation of net income: Accumulation
- Allocation of net realised capital gains: Accumulation

Right of redemption: Orders are executed in accordance with the table below

Business day	Day of establishment of the NAV (D)	The business day following the valuation day (D+1)	Two business days following the valuation day (D+2)
Daily receipt of orders and daily centralisation of subscription and redemption orders before 12:00 a.m. (Paris time)	Execution of the order at the latest on D	Publication of the net asset value (NAV)	Settlement of redemption orders

Targeted retail investors: This product may be suitable for retail investors with a limited level of knowledge of financial markets and products who seek exposure to bonds and other international debt securities and who accept the risk of losing part of the invested capital.

The UCI may not be offered or sold in the United States. For further information, please refer to section "11. Eligible subscribers and typical investor profile" in the prospectus.

Recommendation: This Fund may not be suitable for investors planning to withdraw their investment within three years.

Name of custodian: CACEIS BANK

Where/how to obtain information on the UCI:

All other practical information on this product, including the latest unit price, the prospectus, the latest annual and periodic reports, the composition of assets and the standards of LAZARD FRERES GESTION SAS with regard to the exercise of voting rights, as well as the report on the exercise of voting rights, will be sent out within eight working days upon written request to LAZARD FRERES GESTION SAS - 25, rue de Courcelles, 75008 Paris, France.

WHAT ARE THE RISKS AND WHAT RETURN COULD I GET?

Risk indicator:

Recommended holding period:

3 years

The risk indicator assumes that you keep the product for 3 years. The actual risk may be very different if you opt to exit before the end of the recommended holding period, and you may get less in return.

Other sizeable risks not taken into account in the indicator:

- Credit risk
- Derivatives risk
- NOTE: this UCI may invest 100% of its assets in issues of debt securities with low credit quality and entails very high credit risk.

The synthetic risk indicator is used to assess the risk level of this product compared with others. It indicates the probability that this product will incur losses in the event of market movements or if we are unable to pay you. We have classified this product in risk class 3 of 7, which is a risk class between low and medium. In other words, the potential losses linked to the future results of the product are at a low to medium level and, if the situation were to deteriorate on the markets, it is unlikely that the ability of LAZARD FRERES GESTION SAS to pay you would be affected. As this product does not provide protection against market risks, you could lose all or part of your investment.

Performance scenarios:

The figures shown include all costs of the product itself, but not necessarily all fees due to your advisor or distributor. These figures do not take into account your personal tax situation, which may also affect the amounts you will receive.

What you will get from this product depends on future market performance. Future market developments are random and cannot be accurately predicted.

The unfavourable, intermediate and favourable scenarios presented represent examples using best and worst case performance, as well as the average performance of the product and of a benchmark index over the past 10 years. Markets could evolve very differently in the future.

Recommended holding period: 3 years Investment example: €10 000			
Scenarios		If you exit after 1 year	If you exit after 3 years
Minimum	There is no guaranteed minimum return. You could lose all or part of your investment.		
Stress	What you could get after deducting costs	3 740 €	7 520 €
	Average annual return	-62,6%	-9,1%
Adverse	What you could get after deducting costs	8 360 €	7 750 €
	Average annual return	-16,4%	-8,2%
Interim	What you could get after deducting costs	9 870 €	9 930 €
	Average annual return	-1,4%	-0,2%
Favourable	What you could get after deducting costs	12 330 €	10 520 €
	Average annual return	23,2%	1,7%

The stress scenario shows what you could get in extreme market situations.

Adverse scenario: This type of scenario occurred for an investment between 30/03/2019 and 30/03/2020

Interim scenario: This type of scenario occurred for an investment between 30/06/2016 and 30/06/2017

Favourable scenario: This type of scenario occurred for an investment between 30/03/2020 and 30/03/2021

WHAT HAPPENS IF LAZARD FRERES GESTION SAS IS UNABLE TO MAKE PAYMENTS?

The product is a co-ownership of financial instruments and deposits separate from the portfolio management company. In the event of default by the latter, the assets of the product held by the custodian will not be affected. In the event of default by the custodian, the risk of financial loss to the product is mitigated by the legal segregation of the assets of the custodian from those of the product.

WHAT WILL THIS INVESTMENT COST ME?

The person who sells you this product or who gives you advice about it may ask you to pay additional costs. If so, this person will inform you about these costs and show you the impact of these costs on your investment.

Costs over time:

The tables show the amounts deducted from your investment to cover the different types of costs. These amounts depend on the amount you invest, how long you hold the product and the performance of the product. The amounts shown here are illustrations based on an example of an investment amount and different possible investment periods.

We have assumed that:

- in the first year you will get back the amount you invested (annual return of 0%)

- for the other holding periods, the product evolves as indicated in the intermediate scenario
- €10 000 is invested

	If you exit after 1 year	If you exit after 3 years
Total costs	148 €	245 €
Impact of annual costs	1,5%	0,8% each year

(*) It shows how costs reduce your return annually over the holding period. For example, it shows that if you exit at the end of the recommended holding period, your average return per year is expected to be 0,6% before deduction of costs and -0,2% after deduction of costs.

Breakdown of costs:

One-off costs at entry or exit		If you exit after 1 year
Entry costs	1,00% of the amount invested. This is the maximum amount you could be required to pay. The person selling you the product will inform you of the actual costs.	Up to €100
Exit costs	We do not charge exit costs.	0 €
Recurring costs incurred each year		
Management fees and other administrative and operating costs	0,45% of the value of your investment per year. This estimate is based on actual costs over the past year.	45 €
Transaction costs	0,03% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the investments underlying the product. The actual amount varies depending on how much we buy and sell.	3 €
Incidental costs incurred under specific conditions		
Performance-related fees	There is no performance fee for this product.	0 €

HOW LONG DO I HAVE TO KEEP IT AND CAN I WITHDRAW MONEY EARLY?

Recommended holding period: 3 years

This product does not have a minimum holding period requirement. The recommended holding period (3 years) has been calculated to be consistent with the product's investment objective.

You may withdraw your investment before the end of the recommended holding period, without any charges or penalties under the conditions set out in the "Right of redemption" section. The risk profile of the product may be very different if you opt to exit before the end of the recommended holding period.

HOW CAN I MAKE A COMPLAINT?

Any complaints regarding this product can be addressed to the Legal Department of LAZARD FRERES GESTION SAS:

By post: LAZARD FRERES GESTION SAS - 25, rue de Courcelles 75008 Paris France

By email: lfg.juridique@lazard.fr

A description of the complaint handling process is available on our website at www.lazardfreresgestion.fr.

OTHER RELEVANT INFORMATION

The UCI falls under Article 8 of Regulation (EU) 2019/2088, the Sustainable Finance Disclosure Regulation (SFDR).

You can obtain more information on this product on the website of LAZARD FRERES GESTION SAS. A paper copy will be made available free of charge upon written request to LAZARD FRERES GESTION SAS - 25, rue de Courcelles 75008 Paris France. You can also find information on the product's performance over the past years and performance scenario calculations at https://www.lazardfreresgestion.fr/FR/Fiche-fonds_93.html?idFond=ST5 Where this product is used as a unit-linked vehicle for a life insurance or capitalisation contract, additional information about this contract, such as the costs of the contract, which are not included in the costs indicated in this document, the contract in the event of a claim and what happens in the event of default of the insurance company, are presented in the key information document of this contract which must be provided by your insurer or broker or any other insurance intermediary in accordance with their legal obligation. If you disagree with a response to a complaint, you may choose to contact the AMF Ombudsman (Autorité des Marchés Financiers - 17 place de la Bourse, 75082 Paris Cedex 02), once you have exhausted all internal appeal procedures. The form for requesting mediation from the AMF and the mediation charter are available on the website <http://www.amf-france.org>.

In your UCI, there is a redemption cap ("Gates"). Please refer to point 15 of the prospectus.

KEY INFORMATION DOCUMENT

Lazard Sustainable Credit 2025

LAZARD
FRÈRES GESTION

OBJECTIVE

This document contains key information about the investment product. It is not a sales document. This information is required by law to help you understand the nature and potential risks, costs, gains and losses of this product and to help you compare it to other products.

PRODUCT

Product name:	Lazard Sustainable Crédit 2025 - ED H-EUR units
ISIN code:	FR0013464153
PRIIPS Initiator:	LAZARD FRERES GESTION SAS
Website:	www.lazardfreresgestion.fr
Contact:	Call +33 (0)1 44 13 01 79 for more information
Competent authority:	The French Financial Markets Authority (Autorité des Marchés Financiers- AMF) is responsible for supervising LAZARD FRERES GESTION SAS with regard to this key information document. LAZARD FRERES GESTION SAS is approved in France under no. GP-04000068 and regulated by the AMF.
Country of authorisation and approval:	AMF.
Date of production of the key information document:	06/08/2024

WHAT DOES THIS PRODUCT CONSIST OF?

Type: Undertaking for Collective Investment in Transferable Securities (UCITS), Mutual Fund (FCP)

Term: The UCI's term is 99 years, commencing from 10/12/2019, except in the event that the Fund is dissolved before the end of the term or extended pursuant to the regulations.

Objectives:

Obtain an annualised performance net of management fees, hedging and estimated default calculated by the management company equal to 2,40% at June 30th, 2025, by investing mainly in bonds whose issuers are companies and financial institutions. These investments are made without financial rating constraints, traded in euros and/or US dollars and/or pounds sterling, while taking environmental, social and governance criteria into account. The management company would like to point out that there is a risk that the issuer's actual financial position may turn out to be weaker than predicted; and that such unfavourable conditions (e.g., higher number of defaults, lower recovery rate) will have a negative impact on the fund's performance. As a result, it may not be possible to achieve the investment objective. The Fund seeks to take advantage of attractive actuarial yields on corporate bonds. The Fund is invested only in bonds or securities of issuers the registered offices of which are established in OECD-member countries and/or in securities listed on a financial market of one of these countries.

The Fund's investment strategy is mainly based on a carry approach. Nevertheless, the manager has leeway to actively manage the portfolio by selling and buying securities. The fund's turnover rate will therefore be low. As an exception to the 5%-10%-40% ratios, the management team may invest more than 35% of the UCI's net assets in securities guaranteed by an EEA Member State or the United States. The UCI promotes environmental and/or social characteristics within the meaning of Article 8 of Regulation (EU) 2019/2088, the so-called "SFDR". The consideration of ESG criteria impacts the overall structure of the portfolio by investing exclusively in bonds with an initiated, convincing or advanced ESG profile according to our ESG partner. This approach excludes at least 20% of the Fund's investment universe. The modified duration will be between 0 and 5,5.

The investment strategy consists, based on this ESG investment universe, in applying a quantitative filter to isolate bonds that fit the Fund's investment strategy through the appropriate liquidity levels (sufficient amount in circulation), first end maturity date or early repayment date (before June 30th, 2025), and issuance currency. To build his portfolio, the portfolio manager conducts his own qualitative analysis of the bonds. It also refers to agency ratings but does not rely on them solely and mechanically.

As the bonds in the portfolio reach maturity and are redeemed, the manager may reinvest in:

- bonds whose maturities (end maturity or the issuer or holder's repayment options) fall on or before June 30th, 2025,
- debt securities (maturing no later than June 30th, 2025) or money market instruments and up to 100% of the Fund's assets. The manager may also invest in additional Tier 1 contingent convertible bonds (CoCos) up to a maximum of 35 % of the net assets. The securities will be denominated in euros, US dollars and pounds sterling and will be hedged against foreign exchange risk with a residual foreign exchange risk of a maximum of 5% of the Fund's net assets.

The Fund may invest up to the amount of the net assets in forward financial instruments traded on French or foreign regulated, organised or over-the-counter markets. The manager may take positions in futures contracts or forward exchange contracts solely with a view to hedging the portfolio against foreign exchange risk.

Allocation of distributable income:

- Allocation of net income: Distribution and/or retention
- Allocation of net realised capital gains: Accumulation and/or Distribution and/or Retention

Right of redemption: Orders are executed in accordance with the table below

Business day	Day of establishment of the NAV (D)	The business day following the valuation day (D+1)	Two business days following the valuation day (D+2)
Daily receipt of orders and daily centralisation of subscription and redemption orders before 12:00 a.m. (Paris time)	Execution of the order at the latest on D	Publication of the net asset value (NAV)	Settlement of redemption orders

Targeted retail investors: This product may be suitable for retail investors with a limited level of knowledge of financial markets and products who seek exposure to bonds and other international debt securities and who accept the risk of losing part of the invested capital.

The UCI may not be offered or sold in the United States. For further information, please refer to section "11. Eligible subscribers and typical investor profile" in the prospectus.

Recommendation: This Fund may not be suitable for investors planning to withdraw their investment within three years.

Name of custodian: CACEIS BANK

Where/how to obtain information on the UCI:

All other practical information on this product, including the latest unit price, the prospectus, the latest annual and periodic reports, the composition of assets and the standards of LAZARD FRERES GESTION SAS with regard to the exercise of voting rights, as well as the report on the exercise of voting rights, will be sent out within eight working days upon written request to LAZARD FRERES GESTION SAS - 25, rue de Courcelles, 75008 Paris, France.

WHAT ARE THE RISKS AND WHAT RETURN COULD I GET?

Risk indicator:

Recommended holding period:

3 years

The risk indicator assumes that you keep the product for 3 years. The actual risk may be very different if you opt to exit before the end of the recommended holding period, and you may get less in return.

Other sizeable risks not taken into account in the indicator:

- Credit risk
- Derivatives risk
- NOTE: this UCI may invest 100% of its assets in issues of debt securities with low credit quality and entails very high credit risk.

The synthetic risk indicator is used to assess the risk level of this product compared with others. It indicates the probability that this product will incur losses in the event of market movements or if we are unable to pay you. We have classified this product in risk class 3 of 7, which is a risk class between low and medium. In other words, the potential losses linked to the future results of the product are at a low to medium level and, if the situation were to deteriorate on the markets, it is unlikely that the ability of LAZARD FRERES GESTION SAS to pay you would be affected. As this product does not provide protection against market risks, you could lose all or part of your investment.

Performance scenarios:

The figures shown include all costs of the product itself, but not necessarily all fees due to your advisor or distributor. These figures do not take into account your personal tax situation, which may also affect the amounts you will receive.

What you will get from this product depends on future market performance. Future market developments are random and cannot be accurately predicted.

The unfavourable, intermediate and favourable scenarios presented represent examples using best and worst case performance, as well as the average performance of the product and of a benchmark index over the past 10 years. Markets could evolve very differently in the future.

Recommended holding period: 3 years Investment example: €10 000			
Scenarios		If you exit after 1 year	If you exit after 3 years
Minimum	There is no guaranteed minimum return. You could lose all or part of your investment.		
Stress	What you could get after deducting costs	3 720 €	7 140 €
	Average annual return	-62,8%	-10,6%
Adverse	What you could get after deducting costs	8 370 €	8 150 €
	Average annual return	-16,2%	-6,6%
Interim	What you could get after deducting costs	9 970 €	9 850 €
	Average annual return	-0,3%	-0,5%
Favourable	What you could get after deducting costs	12 050 €	10 260 €
	Average annual return	20,5%	0,9%

The stress scenario shows what you could get in extreme market situations.

Adverse scenario: This type of scenario occurred for an investment between 30/09/2021 and 30/09/2022

Interim scenario: This type of scenario occurred for an investment between 30/06/2016 and 30/06/2017

Favourable scenario: This type of scenario occurred for an investment between 30/03/2020 and 30/03/2021

WHAT HAPPENS IF LAZARD FRERES GESTION SAS IS UNABLE TO MAKE PAYMENTS?

The product is a co-ownership of financial instruments and deposits separate from the portfolio management company. In the event of default by the latter, the assets of the product held by the custodian will not be affected. In the event of default by the custodian, the risk of financial loss to the product is mitigated by the legal segregation of the assets of the custodian from those of the product.

WHAT WILL THIS INVESTMENT COST ME?

The person who sells you this product or who gives you advice about it may ask you to pay additional costs. If so, this person will inform you about these costs and show you the impact of these costs on your investment.

Costs over time:

The tables show the amounts deducted from your investment to cover the different types of costs. These amounts depend on the amount you invest, how long you hold the product and the performance of the product. The amounts shown here are illustrations based on an example of an investment amount and different possible investment periods.

We have assumed that:

- in the first year you will get back the amount you invested (annual return of 0%)

- for the other holding periods, the product evolves as indicated in the intermediate scenario
- €10 000 is invested

	If you exit after 1 year	If you exit after 3 years
Total costs	148 €	244 €
Impact of annual costs	1,5%	0,8% each year

(*) It shows how costs reduce your return annually over the holding period. For example, it shows that if you exit at the end of the recommended holding period, your average return per year is expected to be 0,3% before deduction of costs and -0,5% after deduction of costs.

Breakdown of costs:

One-off costs at entry or exit		If you exit after 1 year
Entry costs	1,00% of the amount invested. This is the maximum amount you could be required to pay. The person selling you the product will inform you of the actual costs.	Up to €100
Exit costs	We do not charge exit costs.	0 €
Recurring costs incurred each year		
Management fees and other administrative and operating costs	0,45% of the value of your investment per year. This estimate is based on actual costs over the past year.	45 €

In your UCI, there is a redemption cap ("Gates"). Please refer to point 15 of the prospectus.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Lazard 2030
Legal entity identifier: 9695001672QKIDA4Q543

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the companies in which the financial product invests follow good governance practices.

The UE taxonomy is a classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

☐ It made sustainable investments with an environmental objective: %	☒ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 20,40 % of sustainable investments
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective and carried out in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective carried out in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made sustainable investments with a social objective: %	☐ It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

In implementing its investment strategy, security analysis, and ESG integration process described below, the portfolio promotes the following environmental characteristics:

Environmental policy:

- Integration by companies of environmental factors appropriate to the sector, geographic location and any other relevant material factor
- Development of an environmental management strategy and system
- Development of a climate strategy

Controlling environmental impacts:

- Limiting and adapting to global warming
- Responsible water and waste management
- Preservation of biodiversity

Managing the environmental impact of products and services:

- Ecodesign of products and services
- Environmental innovation

as well as the following social characteristics:

Respect for human rights:

- Prevention of situations of human rights violations
- Respect for the right to safety and security of persons
- Privacy and data protection

Human resources management:

- Constructive social dialogue
- Training and career management conducive to human development
- Promotion of diversity
- Health, safety and well-being at work

Value chain management:

- Responsible supply chain management
- Product quality, safety and traceability

This product does not use a specific index to determine its alignment with the environmental and social characteristics it promotes.

Sustainability indicators measure how the environmental or social characteristics promoted by the product are attained.

● How did the sustainability indicators perform?

The achievement of the environmental and social characteristics promoted by this product is measured by sustainability indicators: These indicators are described below:

In terms of valuation in the internal analysis model:

The ESG analysis of directly held securities is based on a proprietary model that relies on an internal ESG grid. Based on the various data provided by our ESG partners (non-financial analysis agencies, external service providers, etc.), the annual reports of the companies and direct exchanges with them, the analysts responsible for monitoring each stock draw up an internal ESG rating.

This score is based on both a quantitative (energy intensity, staff turnover rate, Board independence rate, etc.) and qualitative approach (solidity of environmental policy, employment strategy, competence of directors, etc.).

Each E, S and G pillar is rated from 1 to 5 based on a minimum of five relevant key indicators per dimension.

These internal ESG ratings are built into the valuation models through the Beta used to define the weighted average cost of capital for equity management and to the issuer selection process and the determination of issuers' weight in the portfolio for bond management.

In terms of controlling the elements of the investment strategy with an external data provider:

In addition, to confirm the robustness of the internal model, the analysts-managers in charge of management compare the portfolio's average ESG rating to that of its reference ESG universe.

Evolution of the ESG score

The portfolio's ESG reference universe is:
70%ER00 + 30%HE00

● ... and compared to previous periods?

● **What were the objectives of the sustainable investments that the financial product was designed to achieve, and how did the sustainable investments made contribute to them?**

The definition of sustainable investment within the meaning of SFDR is based on the selection of indicators that show a substantial contribution to one or more environmental or social objectives, it being understood that these investments must not cause significant harm to any of these objectives and that the companies in which the investments are made apply good governance practices.

The environmental indicators used are as follows:

- Carbon footprint (PAI 2)
- Carbon intensity (PAI 3)
- Implied temperature rise (ITR)
- Number of “low-carbon” patents held

The social indicators used are as follows:

- % women in executive management
- Number of hours of training for employees
- Benefits coverage
- Diversity policies by management

Substantial contribution is measured by applying indicator thresholds.

The table below presents the rules (targets) set for each indicator as well as the result obtained over the past period. The result is the average share of the portfolio invested in companies meeting these criteria, calculated on a quarterly basis. The average share is calculated according to the average positions observed over the past period, coupled with the non-financial data at the end of the period.

	Rule	Average share of the portfolio
Carbon footprint in M	Included in the lowest 20% of the sector	3,89%
GHG intensity	Included in the lowest 20% of the sector	10,84%
Implied temperature rise in 2050	≤2°C	37,77%
Number of low-carbon patents	Included in the top 20% of the universe	13,82%
Alignment with the European Taxonomy	Greater than or equal to 10%	9,59%
Approval of the trajectory by SBTi	Trajectory and climate targets approved by the Science Based Targets initiative	
% of women in executive management	Included in the top 20% of the universe	22,75%
Number of hours of training for employees	Included in the top 20% of the universe	6,00%
Benefits coverage	See sustainable investment presentation www.lazardfreresgestion.fr	6,95%
Diversity policies by management	See presentation www.lazardfreresgestion.fr	32,00%

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The absence of significant harm is assessed on the basis of all the PAI indicators listed in Table 1 of Annex I the Regulatory Technical Standards of the SFDR Regulation. In the event of insufficient coverage of the investment universe for certain indicators, substitution criteria may exceptionally be used. Using alternative criteria is subject to the independent control of the Risks and Compliance department. Alternative indicators are also presented on the Lazard Frères Gestion website under the heading "Sustainable investment methodology".
www.lazardfreresgestion.fr/FR/ESG-ISR/Notre-approche_147.html#section05."

How have the indicators for adverse impacts on sustainability factors been taken into account?

Indicators of the principal adverse sustainability impacts (PAI) are considered at two levels:

- firstly, they are integrated into the internal analysis of each security monitored, carried out by our analyst-managers in the internal ESG analysis grids.
- in addition, they are used to assess the share of sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Compliance with minimum labour and human rights safeguards (OECD Guidelines for Multinational Enterprises and UN Guiding Principles on Business and Human Rights) and the eight fundamental conventions of the International Labour Organization is a key indicator for verifying that companies in which investments are made apply good governance practices.

We therefore check whether the company applies a labour rights due diligence policy in accordance with the eight fundamental conventions of the International Labour Organization (PAI 10) as part of our DNSH process. We also ensure that the investments made apply good governance practices, by monitoring a governance rating from a data provider and the internal rating on the Governance pillar.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The proprietary model for ESG analysis of portfolio companies takes into account all indicators related to companies' principal adverse impacts (PAI) in terms of sustainability.

These indicators are integrated into the internal grids used to establish a security's ESG rating, which is taken into account in the valuation models through the Beta used to define the weighted average cost of capital for equity management and in the process of selecting issuers and determining their portfolio weight for bond management.

In addition, as stated above, all of the PAI indicators listed in Table 1 of Annex I of the Regulatory Technical Standards of the SFDR are taken into account in the definition of sustainable investment.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: From 01/07/2024 to 30/06/2025

	Largest investments	Sector	Percentage of assets	Country
1	LAZARD EU SHRT TRM MONEY M-C	UCIs	9,85%	FRANCE

15	ORANGE 2.375% 15/04/2025 EMTN	INFORMATION AND COMMUNICATION	1,80%	FRANCE

What was the proportion of sustainability-related investment?

• What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

An investment is considered sustainable if it complies with at least one of the rules set out above. A company can therefore be considered as environmentally and socially sustainable.

● In which economic sectors were the investments made?

	#1A Sustainable	#1B Other E/S characteristics
■ Mining and quarrying		0.02%
■ Manufacturing	4.03%	8.67%
■ Electricity, gas, steam and air conditioning supply	1.84%	2.56%
■ Water supply; sewerage, waste management and remediation activities	0.12%	0.05%
■ Construction	0.23%	
■ Wholesale and retail trade; repair of motor vehicles and motorcycles	0.57%	0.64%
■ Transportation and storage	0.02%	0.11%
■ Accommodation and food service activities		0.21%
■ Information and communication	3.97%	1.84%
■ Financial and insurance activities	9.18%	15.77%
■ Real estate activities	0.08%	0.12%
■ Public administration		0.11%
■ Other service activities		0.81%
■ UCIs	0.33%	0.32%

Exposure to the fossil fuel sector averaged 6,96% over the period.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

- Did the financial product invest in fossil gas and/or nuclear energy activities aligned with the EU Taxonomy?

☐ Yes:

☐ In fossil gas

☐ In nuclear energy

☒ No

Taxonomy-aligned activities are expressed as a share of:

- turnover reflects the “greenness” of the companies in which the financial product invests;
- capital expenditure (CapEx) showing the green investments made by the companies in which the financial product invests, e.g. for a transition to a green economy;
- operational expenditure (OpEx) reflecting green operational activities of the companies in which the financial product invests.

The two graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

The calculation of investment percentages aligned with the EU Taxonomy is based on estimated data.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The symbol represents sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of investments made in transitional and enabling activities?**

At the date of production of this document, Lazard Frères Gestion does not have the data needed to identify the share of transitional or enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy is 17,02%.

It corresponds to all activities not aligned with the Taxonomy but respecting the environmental objectives of sustainable investment mentioned above.

What was the share of socially sustainable investments?

The share of socially sustainable investments is 18,90%.

It corresponds to all activities not aligned with the Taxonomy but respecting the social objectives of sustainable investment mentioned above.

What investments were included under "other", and were they subject to minimum environmental or social safeguards?

The "other" category consists mainly of money market UCIs and cash. Over the past period, the "other" segment represented on average 0,83%.

What actions have been taken to achieve the environmental and/or social characteristics during the reference period?

The binding elements used in the context of the investment strategy to attain the environmental and social objectives promoted by this product cover, for directly held securities in the portfolio:

- The non-financial analysis rate

The rate of non-financial analysis of the product's investments in cash securities is, according to the product's investment categories, higher than:

- 90% for equities issued by large capitalisation companies with their headquarters in "developed" countries, debt securities and money market instruments with an investment grade credit rating, sovereign debt issued by developed countries;
- 75% for equities issued by large capitalisation companies with their headquarters in "emerging" countries, equities issued by small and mid caps, debt securities and money market instruments with a high yield credit rating and sovereign debt issued by "emerging" countries.

Over the past period, the non-financial analysis rate was 99,17% on average.

These rates are expressed as a percentage of total assets.

- The portfolio's average ESG rating

The analysts-managers ensure that the portfolio's weighted average ESG rating is higher than the average of the reference universe by using Moody's ESG non-financial rating framework

The portfolio's reference ESG universe is:
70%ER00 + 30% HE00

In addition, the management company makes exclusions prior to investments:

- Normative exclusions related to controversial weapons (cluster munitions, anti-personnel mines, biological and chemical weapons) and violations of the UN Global Compact.
- Sector exclusions (tobacco and thermal coal).
- Geographical exclusions (tax havens on the FATF list).

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared with the reference benchmark?

Not applicable

● How does the reference benchmark differ from a broad market index?

Not applicable

● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?
